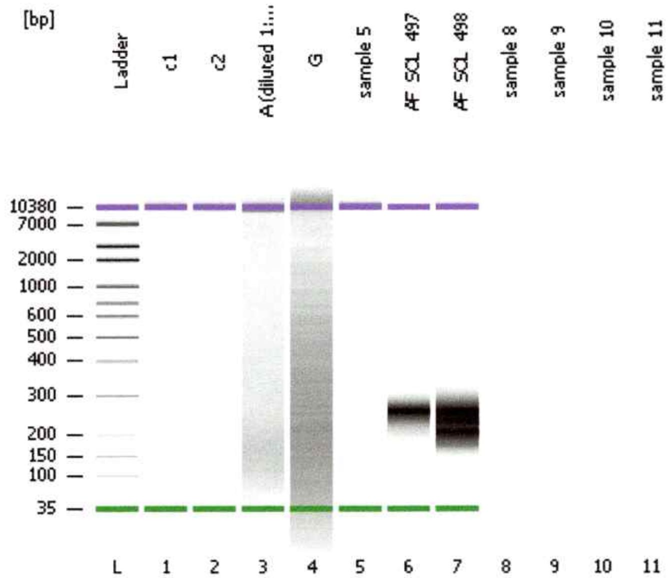
Electrophoresis File Run Summary



Instrument Information:

Instrument Name:	DE72901264	Firmware:	C.01.069
Serial#:	DE72901264	Type:	G2939A

Assay Information:

Assay Origin Path:	C:\Program Files\Agilent\2100 bioanalyzer\2100 expert\assays\dsDNA\High Sensitivity DNA.xsy
Assay Class:	High Sensitivity DNA Assay
Version:	1.0
Assay Comments:	Copyright © 2003-2009 Agilent Technologies

Chip Information:

Electrophoresis Assay Details

General Analysis Settings

Number of Available Sample and Ladder Wells (Max.) : 12
Minimum Visible Range [s] : 32
Maximum Visible Range [s] : 138
Start Analysis Time Range [s] : 33
End Analysis Time Range [s] : 137.5
Ladder Concentration [pg/µl] : 1950
Uses Standard Area for Ladder Fragments
Lower Marker Concentration [pg/µl] : 125
Upper Marker Concentration [pg/µl] : 75
Used Upper Marker for Quantitation
Standard Curve Fit is Point to Point
Show Data Aligned to Lower and Upper Marker

Integrator Settings

Integration Start Time [s] : 33.05
Integration End Time [s] : 137
Slope Threshold : 0.8
Height Threshold [FU] : 5
Area Threshold : 0.1
Width Threshold [s] : 0.6
Baseline Plateau [s] : 0.5

Filter Settings

Filter Width [s] : 0.5
Polynomial Order : 4

Ladder

Subject: RE: "The Top UFO related story at the Huffington Post in 2013"

Greg, Emily, and Steven,

Thanks! This was a great year to be sure. We have FINALLY found the mutations we believe that strongly suggest the reason(s) for the phenotype/appearance. It has been a long slog through a haystack with a billion needles.

I worked with some high end bio-informaticians here at Stanford (the very famous Atul Butte who is making remarkable discoveries in human health using powerful algorithms to search databases) who specialize in relational alignment of mutations with phenotypes—sifting through thousands of databases for causal relationships. The results are staggering.

It doesn't say the specimen is alien... but it does give a reason for its short stature. Basically, the mutations we have found when compared against mutation databases from 20 other organisms (ranging from worms to flies to mice to human) all point to a series of genes involved in ... guess what... BONE growth and STATURE/Height. The chances these genes would come up by chance are... infinitesimal.

If one looks at things from Jacques Vallee's or John Keel's standpoint, the specimen could be exactly what we are seeing as "human", but still have "other" origins. If indeed JV or JK's view are right (about the ETs really being an inter-dimensional projection or construct), they could easily "create" anything with any phenotype—like a 3D printer.

As I said in the movie—I won't throw the baby out with the bathwater, and I can't PROVE it's not human. But I can give you a good reason for its size. I'll let you/others decide what it means.

For all we know Steve is such a construct. Heaven forbid what we might find if we sequenced Steve... ☺

Happy New Year to all! And many thanks for involving me in the project.

Garry

PS—ARM--- good luck on your fight against Ryan. If people come attacking you on the film and you feel you want a quote from me that you think can in any way help, please let me know.
