

Witness Interview

[REDACTED]

[REDACTED] Army US Department of Public Affairs Office

Enlisted from March [REDACTED] - December [REDACTED]

Grandfather was [REDACTED] - Part of Sperry-Rand Corp.

Other Grandfather and Father were aeronautical engineers/inspectors at Lockheed Plant 42 Palmdale, California

He believes because of his family background, he was fast-tracked into the Dept of Public Affairs Office. Usually it takes 4 years of military experience before one can even apply. Many that are recruited are counter-intel agents. His job was to control information going out to the public regarding military affairs. This is a CIA sponsored office.

When he enlisted he went to Germany, then Iraq, Korea and Afghanistan.

His most important post was at Ft. Irwin, California. One of his jobs was to train troops in a simulated war zone. He did this for 2 years, 18 hours a day. Many of the troops reported to him they were seeing anomalous lights over the battlefield. His Commander told him to not talk about this and to be careful. He saw V-shaped crafts he called "blimps" that would float over the area. They contained very advanced optics and in a real war situation could take in data and internet activity from the region and process it.

Another job was to escort Special ops and Navy seals into the N. Nellis range (area 51). There he saw lots of exotic aircraft many of which frightened him because of their capabilities. His Commander at Nellis was [REDACTED] He was told not speak to anyone there regarding aliens or flying saucers. Most of the people guarding the base were contract workers from the Academy Company formerly known as Blackwater. Once in the base, things were very controlled and compartmented. Everyone had a badge with a color code. You could only drive on a road that matched the color code on your badge or there would be big trouble.

At a dining facility inside Area 51, curtains would open and close automatically when certain aircraft was either landing or taking off. One one occasion, he breached protocol and looked out of the window and saw a 20-30 meter in length triangular aircraft. It was hovering in a hanger and then floated out and took off at a speed that was incomprehensible. Within seconds it left the hanger so quickly it disappeared into space. He was told later it was unmanned, but many times he saw similar craft that were performing exotic maneuvers.

There was a large military exercise called "Jade Helm 15". It was causing a lot of controversy and conspiracy theories in the public so [REDACTED] was sent with his Commander to town hall meetings in the area to diffuse the situation. People were asking about the lights in the sky, trains moving equipment, etc. His Commander was supposed to follow his advise on how to respond to the public, even though [REDACTED] was outranked by him. His Commander lied about everything and told him that *it is*

necessary to play on people's fears and paranoia so no one knows what is really going on. [REDACTED] job was a Force Com Driven Task, which meant he received orders from higher levels of government not directly from his Commander, but yet the Commander acted on his own accord.

What he was called to do as a Public Affairs mouthpiece for the army paralleled Richard Doty. Many of the lies he was forced to tell is what caused him to retire.

There were other times at Ft. Irwin where he saw lights flying in formation, then one separated and landed out in the desert. He was amazed because it did not cause any disturbance at all when it landed. It casually lifted back up and took off. He lived on base with his wife and video-taped 2 glowing lights from his porch. (He sent this video)

The Goldstone Deep Space Research Center was also part of Ft. Irwin. SETI was also involved. A woman named [REDACTED] befriended him who was part of SETI and the female character in the movie [REDACTED] was based on her life.

He specifically stated that Luis Elizondo, David Grusch, David Fravor and Tom DeLong should not be trusted. Since he was in counter-intel, from their use of language he knows they are part of a disinformation campaign.

He worked with people in JTAC - Joint Terminal Attack Controller. They communicate directly with pilots in F-18s and other modern advanced aircraft. He knows the cameras in F-18s have super sharp resolution and

are full color. The tictac images from David Fravor he believes are a lie, since they were fuzzy and black and white. F-18s use the same imagery as certain spy satellites called Prism. You can see the writing in a phone book at the bottom of the Grand Canyon with that technology.

He stated that the Pentagon program Harry Reid claimed to investigate UFOs was bogus. Nothing was every done and Harry Reid's nephew ran a UFO for profit organization which fabricated many details that were spread as disinformation. There was a program in place to help pilots report sightings without losing or ruining their careers, but that was it. The Pentagon has done nothing.

He has travelled all over the world through the Army Public Affairs office when there have been situations to warrant his involvement. He lived and worked in DUMBs, but he calls them STFs - Subterranean Facilities.

His NDA just expired and a friend of his showed him The Lost Century, which inspired him to come forward. He reached out in 2018, but not much happened.

He is aware of the Indications and Warnings Project - False Flag operations regarding ET threat. He knows Elizondo is part of that and it is absolutely real and coming. He was very impressed that Dr. Greer knew of this in detail.

He is willing to go on camera and speak if necessary. He cannot hold these secrets anymore and has more to say. He was honorably

discharged on medical leave because of enduring multiple explosions and had a traumatic brain injury. He could have continued his career, but could not take the deception any longer so he left.

One point he made is that if anyone claims to have been at N. Nellis range ask them about the Loch Ness Monster. There is evidently a huge cutout of Loch Ness placed in the dry lakebed at Groom Lake.
