ROBERT F. PHILLIPS, Lt. Col., GS
Acting US Defense Liaison Officer

This report mentions a UFO sighting near KASHGAR, an oil field near BAK (4147N/8152E) and reported uranium mining at TALDY (4337N/8149E).

(Leave Blank)

COMMENT: There is a remote possibility that the UFO described in paragraph 1. of this report is in fact an eyewitness account of several Chinese Communist MRBM nosecone re-entries in the vicinity of KASHGAR (3931N/7558E). To be sure, the description in the report is not convincing, and it is not known if the interviewer entertained the nosecone possibility when directing his questions to the Source. The time period given for the sightings as August through December 1965 is also earlier than most estimates for Chinese Communist MRBM flight trials. However, the KASHGAR area is roughly in the vicinity of the furthest impact area (1,100 KM down range) of the test range facilities at SHUANG-CH'EN-TZU (DIA SIS 106-65).
