MEMO! WATCHING CHANNEL 51 HERE,
ABOUT BIRDS + FLIGHT COMPARISONS BY
JET AIRCRAFT. GREAT CLOSEUPS OF
HOVERING INCLUDED HARRIER VTOL JET
HAD ALMOST IDENTICAL CURVED AIR INTAKE
NEXT TO FUSILAGE AS THOSE EARLY DISCS
AT MACDILL. CURVED/STREAMLINED, NOT
ROUND. ALSO LOOKED TO BE ABOUT SAME
SIZE ESPECIALLY ON ALL WITH ONLY ONE
INTAKE ON EACH SIDE OF COCKPIT.

I THINK BRITISH MAJOR AIRCRAFT
MANUFACTURING - AVROE - WITH PLANTS
IN CANADA WAS INITIAL DESIGNER OF WHAT
BECAME 'HARRIER'. U.S. FINALLY BOUGHT
FROM THEM FIRST SIMILAR US MARINE
VTOL. LARGE 108' DISC HAD TWO EACH SIDE
SIMILAR CURVED INTAKES - OUTER CURVED
AROUND INNER WITH BOTH INTAKES SIDE BY SIDE
AND NOT OFFSET BACK MUCH FROM EACH OTHER
NOTICE HOW STREAMLINED HARRIER INTAKES ARE!
