

Answer E MAIL

Dear

2/5/05

Enclosed, please find four enlarged aerial photographs taken of MacDill AFB in 1965 and 1969. These photographs were obtained from the USGS and the Florida Department of Transportation. Per your previous letters and comments, I believe you have already located the area of the scrap-yard (see arrow). if you can remember, please indicate where you feel the fishing area was located. This would have been near the road that you and Harold were driving to when you came across the discs. Also, is it possible to recall the building that housed the classified USAF library on base that contained the photos and motion picture film reels? Please return these photos to me when you are finished reviewing them. I have seen a few of the interviews that you have done over the years. The SIGHTINGS program that you were on 10 years ago only showed about one minute of your interview. The more recent interview on March of 2004 with the British TV production company was never added to the one hour documentary that was aired only in England. In fact, due to a technical problem, they ended up ruining the first half of your interview, and what remains from them is un-available. Jack, your experience with these very unique USAF jet disc aircraft is definitely worthy of preserving accurately for historical purposes. I just wanted to ask if I may have permission to do a very high quality video tape interview with you. I would like to utilize enlarged versions of the illustrations that your already familiar with from my website for the interview. I'm planning on using high definition video tape which will enhance both the audio sound quality, and image resolution. please let me know if Saturday February 12th at 12:00 Noon in would work out for you.

2/9
I HAVE TOSSED OUT
EVERTHING NOT
NEEDED ANYMORE.
Warm regards,

THE 4 INTAKES ON LARGE
DISC ARE ENTIRELY
TOO SMALL.
IF YOU DECIDE TO
CHANGE ANY, THE
ENCLOSURE WILL HELP
YOU DO IT CORRECTLY.

2/9/05
- I'M ENCLOSING
SOME YOU SENT AWHILE AGO.
IF YOU MAKE NEW COMPUTER ILLUSTRATIONS,
THE AIR INTAKES ON YOUR PRESENT ONES ARE
QUITE A BIT TOO SMALL AND NEED TO BE
ENLARGED. THE EXHAUSTS ON THE BIG ONE YOU SENT
ARE WAY TOO LARGE ALSO. NOT PERFECT CIRCLE - MORE
ELONGATED

TWO ON EACH SIDE
OF LOWER DISC CLOSE
TO CENTER LINE
