

THERE WAS WHAT

LOOKED LIKE BOMB BAY DOORS
ON BOTTOM RIGHT BEHIND FORWARD
GEAR WELLS AND BETWEEN MAIN GEAR.

VERY CLOSE TO MAIN GEAR WELLS. IT WAS

QUITE LONG ON UNDERSIDE OF
DISC BELOW CABIN FUSILAGE. WOULD
HAVE BEEN VISIBLE ONLY FROM BOTTOM
VIEW IN FLIGHT (CLOSED) AIRCRAFT WAS

PARKED SO THAT WAS ONLY VIEW I SAW, AND
CLOSED.

SGT WHO TOOK ME TO SEE, SAID

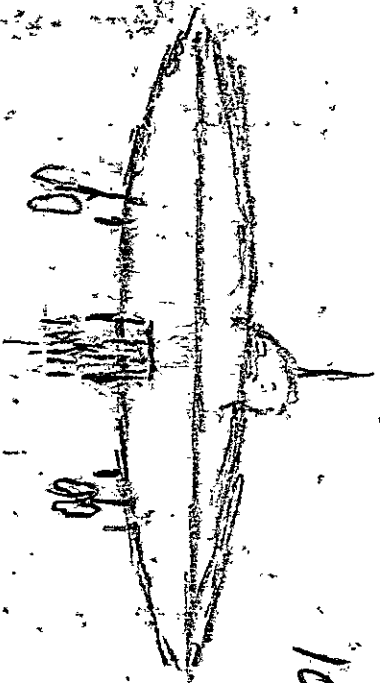

NO ONE HAD EVER BEEN ALLOWED INSIDE LARGE
AIRCRAFT WHILE PARKED AT MACDILL, WHICH
WAS PROBABLY WHY THE PORT SIDE MAIN
GEAR HAD NEVER BEEN REPAIRED FROM
PARTIALLY SAGGING CAUSING CONSIDERABLE
TILT AS PARKED WHEN I SAW IT. IT ALSO
HAD AIR CONTROL FOR DRONES. COULD CARRY
SOME OF THE 10" DRONES AND LAUNCH FROM AIR

"I WASN'T TOLD HOW OR HOW MANY."

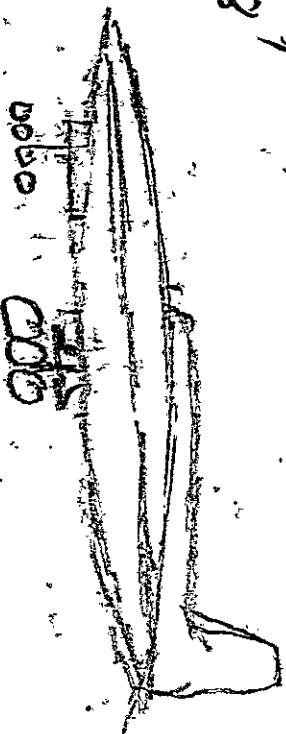

8/18/02

ROUGH DRAFT 1 (HA.1)

DISC AIRCRAFT HAD LANDING GEAR WELL COVERED
DOWN OPEN WHEN PARKED - ONE EACH MAIN GEAR - TWO, FRONT

108'

↓
MORE LIKE THIS

ABOUT 1/2 WAY
DOWN BEHIND

SMALLER PIPES ARE
HAD SIMILAR - DOWN WHEN
PARKED

MAIN GEAR WELL FLAP
