ANDERSON, SOUTH CAROLINA

11 September 1980

In the early morning hours of September 11, 1980 Mr. [REDACTED] (resident of Anderson South Carolina) was awakened by a brilliant light. He quickly jumped out of bed, and witnessed a large luminous object hovering in a horizontal position. Mr. [REDACTED] also alerted his wife, and urged her to view the object as well. The craft was no more than 150 feet away, and approximately forty feet above the tree-tops. The object was completely surrounded with multiple halogen-like headlights which lit up the surrounding area like day, and it emitted an ear-shattering noise. Above the lights were a row of rectangular shaped windows which emanated a deep purple colored light, and measured 6' X 8'. There was a smooth raised "seam" located immediately above the windows, which ran along the entire circumference of the object. The bottom surface of the craft was flat and dark in color. A small red light was connected to a curved pipe-like structure that was located on the bottom of the craft. Mr. [REDACTED] contacted the Anderson County Sheriff's Office, and Deputy [REDACTED] arrived at the scene in time to witness the UFO's departure. Residual effects on the witnesses from the craft included: eye irritation, ringing in the ears, and headaches. Evidence of dangerous radiation was found in the nearby soil where the craft had hovered, and also on pine needles. A recommendation was made that the area under the ship's hovering position be roped off. [REDACTED]

It was unlike anything [REDACTED] has ever seen before. It left him almost transfixed, in a state of awe and exhilaration. The euphoria lasted 24 hours before [REDACTED] said he felt normal again.

[REDACTED] saw the strange fly-, tag object at 5 a.m. About three hours earlier [REDACTED] Road in Anderson had seen something similar. [REDACTED] also described a feeling of excitement and exhilaration after the sighting.

The object has not been identified.

But that does not make it any less real to [REDACTED]. He related his experience to The Progress.

"I had gone out in the yard to work on my wife's car," he said. "She works on the second shift and was still asleep. I heard a buzzing sound, sort of like a big swarm of bees. Or like a Honda, way off in the distance. I looked down the driveway to see if a car was turning around, but I didn't see anything. As I turned back, toward my wife's car I got a glimpse of something over the top of the trees."

"That's the Goodyear blimp!" was my first thought. Then I realized it wasn't a blimp. It was something a lot bigger. I couldn't see it very good, so I walked around to the front of the house. And there it was, out in the clear, right up over me. It was big. Real big. "How big?" he was asked. "Oh, it was as big as Belk's store. But a whole lot taller," he said.

He staunchly stands by his estimate of the size of the object. He says when he looked at it, the object reminded him of a large battleship he had seen once in the Norfolk, Va. harbor.

He described the windows as being very long, and totally black, except for one window that shone with a blinding, glaring light. [REDACTED] said this could have been the sun reflecting off the window, but he couldn't tell for sure. The glare was too bright.

He was specific about the color. He said it appeared to be a metallic, purplish-gray. He was sure the bottom side of the object was metal, of an exceptional smoothness. He saw no seams, although he said there was what appeared to be a metal pipe protruding from the underside.

[REDACTED] could not see the entire shape of the object. He said it appeared to be tilted backward, so that what he saw, primarily, was the bottom of the "saucer." However, he saw enough of the upper part to be sure that it was dome shaped.

"It was shaped sort of like the big water tank up town," he said, "Except a whole lot bigger."

The description given by [REDACTED] in Anderson matched [REDACTED] in most respects except for the lights. [REDACTED], who saw the object in full daylight, said there were no lights on it. [REDACTED] saw the object before daylight, and said it carried blinding lights all around its perimeter.

Both men described the object to artist [REDACTED] of the Pickens County Sheriffs Department. Neither man conferred with the other, but the sketches [REDACTED] drew from

their description were very similar except for the protruding lights reported by [REDACTED].

The sheriff's deputy theorized that the lights could have been retractable, to be pulled into the fuselage of the craft when not in use.

Although several people were reported to have seen the "flying saucer" in Anderson, no one else, apparently, saw the big object in Easley. [REDACTED] said his next door neighbor was not at home at the time, and the neighbor across the street was probably busy with her children inside the house.

After he had watched the strange object for a minute [REDACTED] said he ran into the house to call his wife. But when he got inside he stopped, thinking to himself that his wife would say he was crazy if he told her what he had seen. He hesitated a moment in the kitchen, then ran back outside to reassure himself that the object was still up there above the trees. When he got outside it was gone.

Later in the morning [REDACTED] wife convinced him that he should report the sighting to someone. He called the Pickens County Sheriff's Department, and it was then that he heard for the first time that a UFO had been sighted in Anderson, also.

Many theories have been advanced as to the origin and the identity of the strange object. The Easley Progress called the Greenville-Spartanburg Airport's control tower to ask if an unidentified craft had been picked up on radar.

The individual contacted at the tower said the object did not show up on radar. He expressed considerable skepticism that there actually had been an unidentified flying object in the area.

Some persons believe the flying object might have something to do with a Government project of some sort, possibly a weather balloon. Others wonder if it was something sent over from Russia or some other unfriendly country. And then there are those who fear that it was an interplanetary space craft.

Whatever it was, it was not a figment of [REDACTED] imagination. He saw something very big and beautiful in his front yard last Thursday. He convinces you, when you talk to him about it

UFO Report Perks Interest

By The Associated Press

ANDERSON, S.C. — Two men who investigate sightings of unidentified flying objects say they want to determine if some Anderson County residents really saw what they think they saw.

"I feel like this is a credible, believable sighting," said Pete Mazzola. "We want to see if there is any trace of a UFO."

Mazzola, a New York City policeman, and Jim Fallow, a former New Jersey policeman, came to Anderson Friday as members of the New York-based Scientific Bureau of Investigation, which probes UFO sightings.

Four Anderson County deputies and some residents of the Broadway Lake area of Anderson County reported they watched a brightly lit object in the sky for a couple of hours early Thursday morning.

Some of the residents said before the deputies arrived, the disc-shaped object hovered over their homes, lighting the area and making a humming noise before it zoomed away.

Mazzola said they will take soil and make radiation tests in the area to determine if there was an unusual amount of radioactivity.

He said the U.S. Air Force is not helpful with his organization's investigations.

"They tell us the same thing every time," he said. "There was nothing on their radar and they do not investigate unidentified flying objects."

He said SBI is a private, nonprofit organization which probes about 1,500 UFO sightings each year.

Sheriff's Deputies Confirm Sighting

Noisy UFO Wakes Anderson Residents, Streaks Off

By The Associated Press

ANDERSON, S.C. — A disc-shaped unidentified flying object awakened some Anderson County residents on Thursday with a humming noise and bright lights before speeding away, they said.

The UFO was also spotted at a distance by several Anderson County deputies and residents of Powdermillville and Williamstown who telephoned local radio stations.

Jerry McAllister said he saw the object up close for about three minutes as it hovered over his home near Broadway Lake. "I couldn't see anyone, just all those windows lit up," he said.

Lt. Keith Larter, a spokesman at Shaw Air Force Base near Sumter, said the Air Force had received

no report of a UFO. He said the Air Force "closed its investigation of UFOs back in the 1960s." Radar operators at Greenville-Spartanburg Airport did not record the object, an airport official said.

McAllister, 40, said he woke up at 4:30 a.m. when he heard a loud humming noise. "I thought it was a helicopter crashing in my backyard," he said.

McAllister said he went to the window after hearing the noise and saw the UFO. He awoke his wife, and she awoke one of their daughters.

The object was about 70 feet long, about two stories high and had two rows of windows, all so brightly lit that it was impossible to see anything inside, he said.

"It hovered over the same area for about three minutes," he said. "Then it turned up on its side

and sped off like a streak of lightning at treetop level."

The object stayed within view, however, and a neighbor, Steve Partain, brought out a telescope. McAllister's wife, Faye, said the UFO's windows were easier to see through the telescope.

"It was beautiful, just beautiful," she said. "It was just like a giant star. But it wasn't a star and it wasn't a weather balloon."

McAllister said he reported the object to the sheriff's department. A short time later, he said, he overheard deputies on his police radio monitor saying they believed the sighting was a prank. He called again and told them to come to his home. Then the officers saw it, he said.

"It was so bright it could hurt the naked eye,"

McAllister said. "They apologized to me. We watched it for two hours."

Finally, he said, "it went straight up out of sight."

A spokesman for the Anderson County Sheriff's Department said the object was spotted at a great distance by deputies.

The spokesman, who refused to identify himself, said the department's dispatcher quoted a deputy as saying he saw "some sort of light that was a great deal brighter than anything around it."

Asked about a possible investigation, the spokesman replied: "What is there to investigate? An object was seen. An object left. We couldn't get a tag number on it so we couldn't investigate."
