Dr Greer,

I've been following your project for awhile, and after watching the Shawn Ryan show have decided that perhaps the time is now to share my story.

As I don't want to go into the details twice, could you please point me to the right place to submit my story?

If it is here, I will summarize:

November 1976 Ninilchik, Alaska: Observed spherical object on landing trajectory in the small valley our house looked over, it appeared to be approximately 30 or so feet in diameter. It was a brilliant white color. That was what got my attention initially, what happened next totally changed my life and the way I looked at and felt about the subject matter (these beings came into the house).

August 9th 1978, Atlantic Ocean passing through the Azores on [REDACTED]
I was a [REDACTED] on Aft lookout. Spotted an "air contact" following the ship. Reported to CIC, (Combat Information Center) and was advised to keep reporting on any changes. After getting within about a half mile from the ship, it entered the water and "disappeared". I reported that, and thinking it was an airplane that had crashed, reported so and was alarmed we didn't turn around to perform some sort of search and rescue. Was "debriefed" about it by two or three Officers that were riding the ship to Rota Spain (our port of call on 10 August). They informed me that I did NOT see what I saw and not to talk about it.

If you're interested, I can provide more details.
