

UFO LOG Vietnam and Explanation:

1 message

Fri, Aug 4, 2023 at 2:40 PM

Hello

Explanation of the attached logs:

I was a CTR (Communication Technician Radio which I believe is now CTC - Cryptologic Technician Collection) in the USN and served from 1966-1970. I am a former [REDACTED] and I have pretty close contacts in DC and many contacts at the state level of government across the nation.

Aboard the [REDACTED] my role in June of 1968 was to intercept enemy communications and track MiG and other enemy aircraft, relaying that information to the CIC (Combat Information Center) on the carrier who vectored our fighters to the right location to engage.

In June of 1968, I remember the following:

- 1 I was advised by a superior to "watch out for enemy helicopters(first part of June 1968) A few days later I hadn't seen any evidence of helicopters, so I asked my superior. "We made a mistake," He said.
2. Soon after(a few days as I remember), I was given a message (which was sent over our most secure communications system, a scrambler) As I remember, the message contained information on "15 unidentified craft".. "4 could be helicopters, the other 11 we do not know what they are" That's all I remember about the message I was given.
3. A few days after that, I asked for the status of the message since I had seen no evidence of UFO's "Oh, that was just a joke!" I don't think anyone in the military would hand a joke, false information .. sent over our most secure communication system...and hand it to a person whose responsibility is to track aircraft... in the middle of a war. The results of such an act are probably a clear violation of Article 107 of the UCMJ. (deliberate distribution of false information) I was told just "forget about it"

So, a few years ago I was watching "Unacknowledged" and was impressed concerning the comments of military personnel on UFO experiences so I did a deep dive on the internet to see if I could find anything in 1968... Vietnam UFOs..to document my experience, and I came up with the attached Marine Battalion Log, originally marked "SECRET" (now declassified)

The log mentioned "15 UFOs" (hardly a coincidence) and "originally thought to be helicopters"(the first warning "watch for helicopters") and also "radar and visual tracking" yet, the crafts remain unknown. We knew all types of aircraft in Vietnam (except these) so there should have been no mystery. The date of the log is June 15th, 1968. Just to make sure, checked my records and found that I was indeed aboard the USS Bon Homme Richard at the time of the events mentioned.

Sidebar:

It is interesting to note at this same time the HMS Hobart (Australian Missile Destroyer) was hit with air-to-air missiles (ours) while operating in the Tiger Island area (UFOs were actively operating in the Tiger Island area) When I asked my superiors how in hell a friendly fire incident can happen under these circumstances, his reply was:

"The F4 Pilot thought the Aussie destroyer was a "helicopter" (again that helicopter explanation)"

Foolish explanation since there are protocols for engagement. And, if true that it was a friendly fire incident, then those protocols were violated.

The HMS Hobart was hit on the 15th of June 1968.. same day of the log entry reporting on UFO activity.

The [REDACTED] was cruising in an area where the UFOs were reported(Tiger Island)

The incident happened quite a ways out over the water, and the USN completely controlled the seas, period. So I don't know how any helicopter or any other craft could have made it out there without getting shot down. And, there are a number of claims out there from Vietnam vets talking about firing on UFOs and having that fire returned back to them.

So, bottom line, I was lied to about the 15 UFO's and I'm not so sure I wasn't lied to about the HMS Hobart. (An Australian citizen is researching this very same case.) I had the proper clearance..(Top Secret Crypto) and with the job that I had, certainly had the "Need to Know"

There is also an old NY Times Article referencing Vietnam's use in 1968 of helicopters (which clearly wasn't true, since I was told "That was a mistake" .They were UFOs) However, this June 18th article does help confirm my experiences aboard the [REDACTED] by the continuous mention of helicopters as an explanation for the strange craft. According to the log, the US Military dismissed the idea that these unknown craft were helicopters.

<https://www.nytimes.com/1968/06/18/archives/sighting-of-enemy-copters-near-the-dmz-is-reported-enemy.html>

Let me know if there is anything I can do.

Warm regards,

[REDACTED]

in the Khe Sanh area after the press announcement of friendly withdrawal from the combat base. Near Khe Sanh, the largest contacts occurred toward the middle of the month when 186 and 131 NVA were KIA by 3/4 (USMC) on 15 and 18 June respectively. PW's identified their unit as the 88th Regiment of the 308th Division. Earlier, the 102nd Regiment of this division had been identified by PW's and documents, and prisoners taken on 7 and 10 June identified their unit as the 83rd Engineer Regiment. This engineer regiment reportedly had the mission of building a road from the Xe Pon River (XD 7832), on the Laos/Quang Tri Province border, to Hue, while the two regiments of the 308th Division would attack Khe Sanh. Aerial photography confirmed the completion of 30 km of the road but large attacks against Khe Sanh did not occur. Additionally, indications of the presence of elements of the 304th Division around Khe Sanh began to diminish. In the northeastern portion of the province, there were several contacts but major portions of the 320th Division appeared to have withdrawn into the DMZ. Toward the end of the month ARVN and U.S. Forces contacted enemy forces east of Quang Tri City. In one contact, the 1st Air Cavalry Division accounted for 225 enemy KIA and 38 PW's. The enemy unit was identified as the 814th Battalion of the Quang Tri Liberation Front. During the late evening hours of 15 June approximately 15 unidentified aircraft, believed to be enemy helicopters, were reportedly sighted in the DMZ area. Since that time there have been numerous sightings, both visual and by radar, of unidentified, slow-moving UFO's in the DMZ area and seaward toward Tiger Island. No hard evidence of these aircraft has yet been received. In Thua Thien Province the enemy was occupied with resupply and assimilation of replacements for most of the month. Enemy units withdrew westward to their base areas in the face of friendly sweep operations. The most significant contact of the period occurred on 3 June, 16 km southeast of Hue (YD 970160) when elements of the 101st Airborne Division and the ARVN Black Panther Company killed 104 enemy and through PSYOPS broadcasts, induced 86 enemy, primarily from the K-4 Battalion/5th Worksite and the C-117th LF Company, to surrender. Friendly operations sweeping west into enemy base areas 101 and 114 met little resistance, but uncovered large quantities of enemy equipment. In Quang Nam Province few sizeable engagements occurred, but the pattern of enemy activity indicated that the forces in this area were recovering more quickly than units elsewhere from the losses sustained during May. In the early part of June the 26th Marines had three successive contacts eight km south of Hill 55 (AT 985597). From the 15th through the 26th of the month enemy activity was concentrated in the Go Noi Island/Hoi An area and was the center of enemy initiated activity in I Corps. Many caches of arms and ammunition were found in the
