

The diagram is a hand-drawn map of a residential area, specifically focusing on a driveway and its surroundings. At the top, a curved boundary represents a road or fence, with a row of circles labeled "BUSHES". Above the bushes are two small rectangular shapes labeled "DEN WINDOWS (2)". To the left of the bushes is a larger shape labeled "HOUSE". Below the bushes, a horizontal line is labeled "SIDE WALK". A dashed line points from the side walk to a point labeled "X", with the annotation "WORMWOOD WATCHED UFO FROM THIS POINT AFTER EXITING FROM EAST SIDE DOOR". Below the side walk, there are three points labeled "1", "2", and "3". Point "1" is connected by a dashed line to point "2", which is connected by a dashed line to point "3". Point "3" is further connected by a dashed line to a point labeled "A". An arrow points from point "A" to a cross-hatched area, with the annotation "IMPRINT WARM WHEN TOUCHED". Another arrow points from the cross-hatched area to a bank, with the annotation "BANK SLOPES DOWN TOWARD EAST. RAIN WASHED OUT IMPRINTS IN CROSS-HATCHED AREA". Below the bank, there is a cross-hatched area labeled "BROKEN BRANCHES". Further down, there is a circle labeled "UNDERGROUND ACTIVE WELL". To the right of the well, there are four points labeled "T", "B", "C", and "D". Arrows point from each of these points to a central location. Below the central location, there is a large, stylized drawing of a triangular object with three circular protrusions at its vertices. This object is surrounded by several smaller circles, some of which are labeled "T". A scale bar at the bottom left indicates a distance of 0 to 8 feet, with the text "SCALE: 1 IN. = 8 FT." below it. A north arrow is located at the bottom center, pointing upwards and slightly to the right, with the letter "N" above it and "S" below it.

On the night of March 5, 1978 (8:45 PM) multiple eyewitnesses reported seeing a strange shaped UFO land 3.2 miles north-east of Douglas airport (within the city limits of Charlotte NC). The unusual craft (having three tri-pod legs) appears to have been a probe measuring approximately twelve feet across which landed, and then collected soil samples by way of a small scoop. Then, the craft turned on various multi-colored lights (red, green yellow, blue) which drew the attention of eyewitnesses. Next, the UFO maneuvered between trees, and moved away rapidly at tree-top level in the direction of the airport. No noise was heard in connection with the craft. Total duration of the sighting was approximately twenty-one seconds. Imprints made by the craft were warm to the touch when examined by the eyewitnesses. Analysis of the broken branches near the vicinity of the landing tested negative for radiation. Two separate UFO sightings were reported on the same night. This CE II case is unique due to the fact that the FAA fielded multiple calls, and that plaster casts were made of the imprints left by the craft.
