NO RESPONSE!

May 9, 1983

Dear 

Sir, since you did not respond to any of my letters (or those of others) regarding the "Blue Room" rumor (after July of 1982), I gave up attempting to correspond with you directly.

I attempted rather to contact other Senators who may have become cognizant of the rumor through you i. e. others on the Select Committee on Intelligence and/or editors of various popular magazines and such who could interview you about the rumor.

In acquiring information in the form of feedback from individuals who are researching the rumor, I have become even more convinced of the integrity of the rumor. I found, for example, (See "A" enclosed) that your visit to FTD (not many months after our petition to you-See "B" enclosed) was your first and only visit there, thus substantiating my statement of letter "C" enclosed.

Senator Durenberger seems to think that I should again approach you directly about this issue. See "D" enclosed.

I therefore submit the following questions to you and would appreciate a definitive response.

→ 1. Have you been apprised of the crash of an aerial object in the New Mexican desert in July of 1947?

2. Was this vehicle piloted?

3. Was this vehicle of established terrestrial origin?

4. Is the debris of this vehicle classified?

5. Is access to the information about this incident restricted?

Any additional information you might provide would be greatly appreciated.

Thankyou for your time, Sir.

Most Sincerely
