

Subj: **WITNESS REPORT** [REDACTED]
Date: 9/10/00 7:31:01 PM Eastern Daylight Time
From: [REDACTED]
To: DrSGreer, [REDACTED]
To: [REDACTED]

1. Obtain full name, address, phone numbers, email and other data and record same:

N [REDACTED]
[REDACTED]
[REDACTED]

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate)

Inventor, engineer, with top secret security clearance.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project

Norman Wootan has a Top Secret clearance, has witnessed ET-related technology, and is the developer of a workable over unity free energy device, specifically a Magnetic Resonance Amplifier. He has encountered serious obstruction preventing his patenting or development of the device. He is willing to go on the record and provide a videotaped interview.

He sent a complete packet on his over unity energy generator to Dr. Greer when he first heard Steven on Art Bell announcing his involvement with over energy R&D, but never got a response. I assured him I'd take up the issue as a reminder with Steven when I spoke with him and get the ball rolling.

The witness is prepared to go on camera and elucidate the direct ET connection to the technology that he has been developing. He will discuss the politics of obtaining patents for such technology and how the politics of influence are stacked against independent progress in this subject area.

The witness is in Leslie's region and she will be doing the on-camera interview. I will consult with her re: physics and technical issues. I will pre-interview Wootan over the phone to ascertain the technical and scientific details prior to Leslie's video interview.

4. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases) ?

Positive, willing to go all out.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials.

Documentation on paper, including communications with U.S. Patent Office, plus the corroboration of colleagues.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

Possible.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc) .

Highly articulate and knowledgeable. Comes across as very credible.
