Subject: Former Coast Guardsman involved in craft recovery
To: "[REDACTED]"
<[REDACTED]>

My name is [REDACTED] and I am a 37 year old male veteran of the US Coast Guard. My reason for contacting you has been that I while I was formerly stationed on the USCGC Sassafras on the island of Guam back between Jan 2002 till about May of 2004, my Cutter that I was stationed on (a now decommissioned 180 ft Buoy Tender) I was involved in a very odd recovery of a disk shaped metallic craft which we recovered around the area just south of Guam near the Marianas Trench.

My cutter that I was aboard while this incident happened was operated by a crew of 60 personnel, 69 men and 1 female who was the ship's XO and one of only 8 of us who were actually allowed to be part of this recovery due to the fact that we were apparently the only ones on the ship who held a top secret security clearance as I came to find out later. I honestly haven't even shared this story with Absolutely anybody until maybe 4 months ago and I can't even begin to tell you how dramatically it has effected every aspect of my life! Including ALL of my social media accounts were PERMANENTLY DISABLED for NO REASON WHATSOEVER! None that was given anyways, Facebook just said due to security reasons they couldn't give me any further details and it was actually via Facebook messenger that I first told my story to an old friend and shortly after that is when all of my accounts were disappearing and weird stuff has been happening on my cell phone! Now I know what I saw, and I also know that during our debriefing afterwards, the 8 of us (including our ship's Captain and XO) we're fed a bunch of BS about what the craft was that we actually recovered and that's when I was forced to sign a non disclosure agreement although I don't remember anything about my life being threatened if I was to ever speak out about the incident, but it was made very clear to us that we were not to even tell our spouses or family members about any of what happened or we would be charged with treason and we all know the potential penalty that it carries with it!

But I would love to speak with somebody more on my experience and my firsthand knowledge of other crafts that have also been recovered in the same area and I have other witnesses who I am trying to come forward as well and maybe we can shed some light on some of the activities that are really going on in our deepest part of the ocean. Please email me back if you are interested in helping me get my story out without this backlash I have been getting and this is a very serious matter and it is exactly the type of thing that DR. Greer tends to cover in his projects so please, my phone number is [REDACTED]. Thanks-[REDACTED]
