Steve,

E[REDACTED] says you've got all his hard core witness info regarding the Norton AFB/ARV roll-out, but haven't followed up on them. Below is his response. Meanwhile, I'm trying one of my high level contacts to see if I can pry this one open from the back door. I can't email this guy, so it will have to be snail mail.

R

Hi [REDACTED]

I have already supplied Dr. Greer with a list a few years ago. He learned about the ARV incident from me as it was published in my book, "Cosmic Top Secret". The additional two witnesses to this would not talk - one was [REDACTED]. However, ex-military persons have written and said that no such incident could have happened as they were on base at that time and there was no visitor activity. The original report on this came from [REDACTED] who told me about it in 1990, but he was not actually a first-hand witness.

I am now out of touch with all those witnesses and none of them wanted to go public. The few I am in touch with are currently involved and they want absolutely no public exposure. So Dr. Greer has all that I could give him and one was a retired three-star General, but as far as I know he never followed this up. Another was a scientist who knew the 3-star, but he has long disappeared into the woodwork.

Best,

[REDACTED]
