

August 26, 2012

Dear Dr. Green,

I am sending you a manuscript of the public trial in Federal Court that proves the CIA participated in the signal event of the 20th century - the killing of JFK. I am a psychiatrist, and believe that trauma remains the unprocessed cause of a PTSD-like inability of the planet to go where Kennedy was taking us; it is notable that [REDACTED] cried for two days, knowing their shared dream of world peace was shattered. If this were only the past, it is best left behind. Unfortunately it remains very much with us, as for instance in Obama's refusal to reveal the truth of extraterrestrial contacts (not to mention my own reluctance to reveal my name).

I do not know whether this is of use to you, or whether it adds to what you already know. You can get in contact with [REDACTED], who is the genius who beat the CIA in open court. The manuscript is directly from the court record.

I wish you the best in your efforts, and regard your mission as an expression of the true spirit of medicine, with the patient as none other than Planet Earth.
