War of the Words - Decoding UFO/Alien Phenomena

[Excerpts]

[REDACTED], the 'bete noir' of American ufology, published [REDACTED] affidavit against [REDACTED], which included [REDACTED] volunteered disclosure of his CIA employment, in Behold a Pale Horse (1991). Appalled by [REDACTED] treatment of abductees [REDACTED] mounted an unsuccessful lawsuit against the artist for practising psychiatry without any professional qualifications. This test case gave a green light to anyone wishing to offer their services as an abduction 'counsellor'.

===

During one of his 1992 Nexus lectures [REDACTED] recalled a meeting with [REDACTED] that took place in an all-night diner in a small Arizona town during 1983. The pair offered to share secret information with [REDACTED] if he could say the correct code (which was apparently "Gold Eagle"):

What bothered me was that I thought that these guys were just as straight as an arrow and there was no cover-up, and here they are telling me a few hours before, 'Aliens are here!' They showed me pictures and stuff like this in my hotel room back in '83 and they were coming on from the position 'They are here'. That certainly may be but it worried me that it was under a code sign and these guys are out here telling the UFO crowd various things, and saying we've got to do something about this cover-up, blah-blah-blah, and they're part of the cover-up! I don't understand. Maybe I misunderstood, and if you're listening, guys, if you see this tape, I'd appreciate a letter... and not from your solicitors either.²⁴
