>
>Hello,
>
>Yes, a visit might be good. I couldn't do a hand-off because I'm not
>relinquishing control of the items.
>
>What info/proof do I have?
>
>JFK: Up on the grassy knoll, behind the fence, was a "badgeman" a since
>identified
>civilian, behind him is "a puff of smoke" and behind that is "a
>railworker". The man
>that created the puff of smoke was the man who had shot the then
>president in the head with the exploding bullet he was witnessed (by a
>deaf man) to have tossed the rifle to another man (the railroad worker
>per witness) who then walked a few yards, broke the weapon down, put it
>into a tool-box and walked down the tracks with it. That man was my
>father who was working for Division 5 of the CIA. He told me about it
>and had the 30.6 in his possession for many years. He did many other
>things that I was told about including popping a side-door open to let
>Jack Ruby in to kill Lee Harvey Oswald. I have the tools that were used
>to pop open that door and I have been told by anonymous military
>person(s) that the tools will match the door that the FBI confiscated
>and should have in the evidentiary room.
>
>I have been an inside confidant my whole life.
>
>Because of the work my father did I also became involved in the
>implantation program. I have physical evidence on my body that proves I
>was implanted and still have the device on my person. I have also been
>directly involved in the STARGATE program and am still involved that's
>why I have to have SECURE measures and want to keep this inside the
>government.
>
>This is the hard-evidence I have. Everybody(CIA, FBI, NSA, etc) knows I
>have it. I have been allowed to keep it and have been informed of many

>things as they have occurred because they want some people to know the
>full story because many of these people will have (and have) died before
>the Cold War was going to be over with.

>
>Let me know if you're still interested. I plan to organize all the
>information I've been privy to and have permission to disseminate it to
>"the proper authorities" when the time came. I am a sleeper agent.
>This is my task. If you're not personally interested in being involved
>let me know. I plan to go down the Special Committee's list and the
>Senate list with this information as soon as I have it organized.

>
>You've done so much work in this area I thought you might like to be
>involved in an inevitable happening. The only thing is I'm not real
>sure if the time is completely correct so the information may not be
>allowed to come out just yet. My indications have been the time is
>right.

>
>Let me know what you think asap. Thank you very much.
