

August 20, 1996

Dear [REDACTED]:

Will drop a note as am [REDACTED]'s "official secretary".

[REDACTED] has absolutely no remembrance of the incident at Marcel's house when some of the "metal" was "cooked" and taken out to the porch. I have a slight remembrance of it but that is all. So you struck out getting any info from either of us on that escapade.

[REDACTED] really is fed up with the entire situation and is not available to anyone for an interview. He has been misquoted and so many untruths have been written that he has washed his hands of the whole affair. Just today he received a letter from someone else who is writing a book. I'm going to tell him what I've told you.

I shall ask a friend who does some research and writing on the Roswell incident if he has any info to send you. When I hear from him, will pass anything which might be helpful to you.

Do you ever hear Art Bell between eleven pm and four am on the radio? He's quite "hypped" on UFO's, etc., and frequently has guests on his program. I take what they say with a grain of salt. But you may tune in occasionally or tape a program or two to see if he's on the subject.

I will get back to you if and when I hear from our friend.

Regards to your folks.

Sincerely

Don
[REDACTED]
