ALL HANDS.....

Please have a look at this unusual letter written by a gentleman from Woodbury Ct., who claims to be just an ordinary citizen, living in my area of rural Connecticut.

The letter delivers an apology to our citizenry for the 47 year coverup of the UFO story. Why? Why written now, at this particular date? And why is it written so carefully as to indicate that a great deal of thought has gone into it's message?

Question: Have any of you seen this letter before, recently, written with the exact same wording or with similar wording which would deliver the same apology? I'm sure you're as interested as I am to find out if this letter, showing up in rural newspapers, might be part of a campaign on the part of some agency of government to gradually release the UFO story.

There would be some logic to a campaign at this time, or at least the start of one. Remember that the Japanese are putting the pressure on all governments to open up. That big "space" museum they are building in Hakui City, to be completed by mid-1996, puts the heat on everybody. The U.S. govt. does not want to be last to acknowledge....anything!

I have talked to Catapano on the phone. He says he is not part of any effort to extend apologies from anyone or any agency. He's evidently attended a couple of my lectures, but that doesn't mean anything....unless that's part of his job... So, this is a follow-up inquiry. If the letter has appeared elsewhere, we'll have learned something!!!
