Subject: Rickenbacker AFB sighting

Hello,
My name is [REDACTED], my father was recently in town visiting ([REDACTED]) and in the early 60's he was based in what was Rickenbacker AFB in Columbus, Ohio, not sure it is still called that. However he kinda took me on a small tour of the place and pointed out the barracks where he lived for several years, and the semi underground messhall. When he confessed one night during chow, as they left, they being him and 2 of his subordinates. They witnessed what he described as a triangular object about 100 yards of the ground, making no noise, just sitting there. He immediately had one of his men grab the instant camera they had in the barracks as he called the tower to see if they see this object. Well the tower not responding right away to his call, made him think something was wrong. His man came back and they were able to grab a couple of pictures of this object, he and his men were very worked up by this time, and object made a suddenly flash of light, and then rose straight up and then left at a high speed to the south he said. Finally he got the tower to pick up the phone, and when he asked about it they laughed and suggested he had eaten something bad in the mess hall. Obviously this was a blow off. Well it was getting late and he and his men went back to the barracks, and turned in, the next morning at the crack of dawn, my dad said a Lt. Col. and 2 men of unknown rank entered the barracks confiscated the pictures, the camera, and suggested to them if they wanted to continue their career in the Air Force they would forget what they saw, since the tower had supposedly not seen anything, (keep in mind the tower wouldn't answer the phone till the object had left), and they no longer had any pictures so who believe them anyway..

Well that was the story he told me.
I was wondering if you had any like stories dealing with Rickenbacker AFB, in the early 60's.
Thanks [REDACTED]
