His grandfather *and* his brother - potential witnesses.

I'll ask if ok to contact them.

Debbie

Subject: Grandfather and UFO's

Hello Dr. Greer, I sent this e-mail to Art Bell a few days ago and thought it might be of some interest. I will try to get my Grandfather to tell me more about this and try to video tape it....

Hello Art... I was reading today about Mr. Greer's disclosure project and found it very interesting.. I listen to your show and thought about e-mailing you in the past about this. My grandfather is a retired Air Force colonel and is now 96 years old. His name is [REDACTED] and wrote the history of aviation medicine while stationed at Wright- Patterson AFB. He has told me many stories. One was how he was in charge of all U.F.O sightings in the U.S. for about a 5-year period in the 40's. When I'd ask him about this, he'd tell me there were so many reports coming in <mostly from pilots> they'd just send them straight to the pentagon. There was one thing he did see that stood out amongst the others, Ivan had been shown a film <filmed by the government> of a ufo landing somewhere in the desert. The strange thing was that it landed next to a semi-busy highway and people were getting out of their cars to see this craft. It landed, a ramp came out of the craft and some beings came out, looked around, got back in and flew off. My grandfather only told me this a few times and would not talk about it to anyone else. My older brother told me that he did say that when he was stationed in WPAFB he did know about the aliens and ufo's that were being stored and that the government wanted to keep it a secret because they were really worried about different diseases they might carry. Well, thank you for reading this. God Bless, [REDACTED]
