Subject: Maybe this can help you.

Priority: 1 (Highest)

If you do not want my personal experiences just scroll to the bolded portion at the end of this email.

Thank you and again good luck.

Steven, I live in Salem OR and when you were here for a lecture and book signing I tried to get a moment with you but you were called away by some one who I assume had some evidence for you as you seemed very happy as I was watching some people being ushered into a room.

I am a firm believer in Full Disclosure and have been a contactee and or abductee since 1949 when my parents, my older brother and I all had a 2-3 hour missing time after a cigar shaped UFO was pacing the car. I was only 2 ½ but it had a significant impact on my life. Mom and dad are both gone but mom had scoop marks, 6 brown spots on her back and deep blood red marks above and below the navel after the event. We did not realize there was missing time till just before dad died in 92 we were discussing it because I wanted to hear once more what happened before dad died, he had just a few months to live.

It was only when we were discussing where he first saw it that we realized that he saw it in one location in Salem and mom saw it about 08-10 miles further NE of Salem. Mom said they got out and watched it as it almost hit the roof of a house as it went over it and dad said NO we did not get out of the car, I had never heard my dad sound scared before and he sounded really scared. So we dropped it because he obviously did not want to talk about it.. Mom was more than interested and we always hoped that we would find the answer but she died in November at age 86 and we never found out what might have happened.

I have had numerous sightings and several missing time events but no pictures even though the camera was next to me on two occasions I did not even think to take a picture.

I also had a large elongated shaped circle imprinted in my back yard at one of my previous addresses here in Salem, and the plants near the fence where this touched all died some with holes in them. Dr Leo Sprinkle (UFO

Researcher) and his wife stopped and checked it out in 91-92 but it was difficult to see by that time. During this time of when the circle appeared I experienced another 3 hour time loss.

My husband and I also witnessed a UFO blow up in the sky one Sunday evening in May during the 90s just before 9:00 PM it flickered and then blew up and we watched molten metal burning as it blew apart and we watched it slowly fall below the tree line. I have no idea how far away it was, there was no sound. I heard of no other reports of this event. I still have information on it but cant recall exact year. After calls to numerous airports and news stations to see if a plane was missing or blew up, I called NORAD, Cheyenne Mountain, CO and spoke to a very nice AF man. He asked me the time and date etc and said he would check it out and call me back. To my surprise he actually called back the next morning before his shift ended and told me The time you saw this object blow up, according to our records, nothing man made entered the atmosphere at that time. I said you mean it was a asteroid or some space junk? he said NO, you are not listening NOTHING MAN MADE entered the atmosphere at that time and then I got the message.. he said I hope this helps you and I thanked him and said goodbye.

So I wish you nothing but luck on your movie and research.. the above information is only to confirm that these events seem to stay in some families and the sighting/missing time in the summer of 1949 was only the beginning. I do not know if my brother ever saw anything else. He did not have much recall of the 1949 event.

Hopefully the information below might help you in your search for witnesses, and or information of noted events.

All I have to share is this I am a volunteer weather spotter for the National Weather Service in Portland OR.

After calling in tips and weather related events for some time I was chatting with one of the women there and we began to discuss UFOs. We got on the subject of Roswell and that event. She said she did not know anything about it personally but that her father or grand father in the military was involved and had something in their safe they said came from the Roswell crash. All I know is her name was Margaret and shortly there after, we were going to meet for coffee and talk about it, but never happened I tried to call her and I was never able to connect with her again. She worked for the US Weather Service in Portland Oregon.

person E
info -
Margaret @
OR weather
service
year?

I cant confirm this but I have no reason to believe it was false information. This was a few years ago but perhaps someone can give you a lead to where this woman is. It is my belief from how she sounded, that this woman was either scared or worried about sharing too much information with me and her relative, could get into trouble.

Thank you.

Kindest Regards,

[REDACTED]
