

Rev. W. Mess 2

Subj: [REDACTED]
Date: [REDACTED] Standard Time
From: [REDACTED]
To: D. [REDACTED] (Steven M. Greer M.D.)

FYI I have tracked down the author of the "Fire from the Sky - the True Story of the Space Shuttles and the Battle of the Harvest Moon" by One Who Knows.

He is living in Texas and is sending me some material on cloning in the mail. I will continue the dialog to see if he would be a suitable witness.

He said that he is aware of only one small error (involving the driver in the Kennedy assassination) in the entire book.

I asked him how come he is still alive, and he said that "they" really don't care as the truth is so far out that they figure no-one will believe it anyway. Where have I heard that before!!

He said that he has also heard that the Shuttles are now taking off, heading North, and landing somewhere else.

His name is [REDACTED] L. [REDACTED]

Hope things are going well.

Best
