I may have a witness who served with the Air Force in the late 70s. This witness had a Top Secret clearance and had friends in even much higher clearances. This witness was shown photographs of alien crashed craft with bodies and retrieval operations.

I may have another witness who served with and is a distant friend of the first witness. This witness is less likely to come forward from what I know of him but I don't know much more than I've heard about this second witness which isn't much other than he was a career officer with the Air Force and worked in Quality Control on the F-117 Stealth Fighter until he just recently retired. This second witness supposedly knows about alien technology used in today's most advanced aircraft.

I'll write back to you when I can speak to this or these witnesses and show them the DVD and National Press Club video and hopefully coax them to do an interview for your project.

Thank you,
