To: D [REDACTED]

[REDACTED] - Steve wants me to forward them all to you to put on file.  
I'm trying to keep an email file of them too, as backup.

[REDACTED]

Steve's response:

> Thank you for your letter and for your kind offer to testify. Where are you  
> located? At some point we would like to meet you and interview you to  
> archive the testimony. We deeply appreciate your courage in coming forward.  
> Best always, Steven M. Greer MD

[REDACTED]

Tx for your time.

I don't expect a personal response.

I really admire what you are doing and want to support this effort. I will ad a link to disclosure.org on my website at the very least.

My feelings about this issue are very intense so I won't rant.

Please contact me at any time.

Cell: 2 [REDACTED]

I live in [REDACTED] wa.

With Respect,

Dw.

thanks very much [REDACTED]  
I have forwarded your email to Dr. Greer's personal email address, for his review.

He won't be able to do anything until Sunday, probably, but I'm sure he will respond.

Thanks again!

Subject: Note of Support, offer to testify,

Dr Greer,

My father was on a crash recovery team, he died from radiation exposure 25 years ago.

The government paid for his entire treatment, 2 million + in 70's dollars, it took 3 years of chemo for him to die after his first diag.

The last year or so of his life he started to confess details about his work.

While in the air-force and after he was on a crash recovery team, as a tech-sgt.

His main job was un-seating and packing the drives for shipment and he described them in detail.

He also worked for Douglas, 3M, and Bell and Howell on technology transfer.

He also worked on the Thor missile and the X15 as a tech.

I was shocked when I watched the National Press Club presentation on the Web. Perhaps the man on the panel that was also part of a recovery team has heard of him?

His name was: L [REDACTED]

He died bitter and angry at his government. He started as a pure cold warrior.

What you are doing is important.

My father and I are the last members of George Washington's family that I know of to hold the Sir Name. We are descended from his brother.

Seriously.

I will testify in my fathers name and in the name of the Washington family under oath if you need me too, like everyone else this is not first hand, however...

George Washington was very interested in preserving the political capital of his name he would have supported me speaking about the death of one of his descendants.

My fathers story should be heard someday.

Best Regards,

[REDACTED]
