Dear [REDACTED]

You have likely received many letters concerning The Disclosure Project's Campaign For Disclosure (see www.disclosureproject.org). I support the objectives and the recommendations made to Congress. Some of this letter reiterates the form letters sent to you. However, I wanted to add personal knowledge of Unidentified Flying Objects.

We as a species have a history of exploring the unknown. Unidentified Flying Objects are common enough that it is time for us to reveal their true identity. Open Congressional hearings as recommended by The Disclosure Project are the appropriate method to satisfy our need to learn about this phenomenon.

My father, a retired airline pilot, had two experiences with UFOs. He and his entire flight crew sited a UFO holding still in the air above their course. He radioed the nearest Air Force base which scrambled a squadron of fighter jets. The fighters never came close as the UFO sped off and disappeared from sight and radar. In another instance, he flew a Boeing 747 on a collision course with a UFO over San Francisco Bay. On that clear day, he and his crew never saw the UFO, but FAA Approach Control had advised them well in advance of the impending collision. Nothing happened to their plane, but the radar indicated the UFO disappeared after the collision. The UFO had been traveling 6,000 miles per hour at 3,000 feet over the Bay. In July 2000, I took a picture of a barn at the south end of Malheur National Wildlife Refuge, Oregon. I did not see the UFO then, but it is in my photograph. I have enough experience with photography to know it is not a camera or film glitch.

The Disclosure Project's recorded testimony of scores of government and other witnesses to UFOs and extraterrestrial events and projects is strong evidence of the existence of an

UFO/extraterrestrial presence on and around Earth. The testimony also includes internal UFO-related government projects and covert activities, space-based weapons programs, and covert, reverse-engineered energy and propulsion system projects. The technologies that are of an extraterrestrial origin, when publicly released within a planned transition period, will provide solutions to global environmental and security challenges.

These numerous recorded witnesses constitute only a small portion of a vast pool of identified present or former military, intelligence, corporate, aviator, flight control, law enforcement, and scientist witnesses, who will come forward when subpoenaed to testify at Congressional Hearings. Without a grant of immunity releasing them from their security oaths, many such unimpeachable witnesses fear to speak out.

The current war on terrorism would have been greatly enhanced in efficiency and in protecting lives if we had had this now secret propulsion technology in military use.

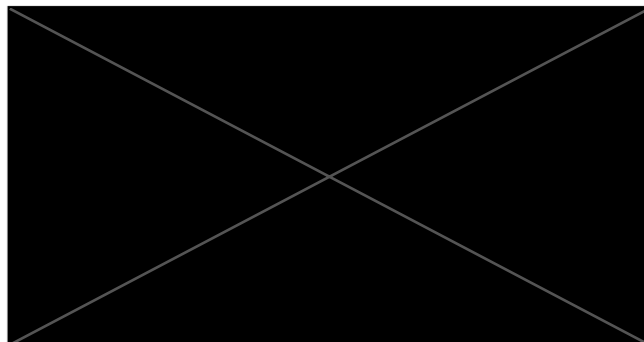

I encourage you to enact and actively support each of the following: -

*To hold open, comprehensive, secrecy-free hearings to take military/agency witness testimony on events and evidence relating to an extraterrestrial presence on and around Earth.

*To hold open hearings on advanced energy and propulsion systems, relating to extraterrestrial phenomenon that, when publicly released, will provide solutions to global environmental challenges. These are technologies, which may now be sequestered behind the National Security Act.

*To enact comprehensive legislation to research, develop, and explore space peacefully and cooperatively with all cultures on Earth and in space.

I would appreciate a reply to know your position.
