

Witness Testimony

[REDACTED]

[REDACTED] has been following your work for some time and decided to reach out after hearing your call out for whistleblowers.

He was commissioned in the Air Force in 1999 and took an early retirement in 2015. He was a Lt. Col when he left and was deployed several times. He states he was in and around numerous "programs" during his time in the Air Force. He is in complete agreement with your take on free energy as he has seen or been involved in various projects. He also has an engineering background. Towards the end of his military career, he worked with the Dept. of Energy and was at the Pentagon for 7 years. He would not give more details on this. He was always in Top 1 or 2 standing on all his reports. He was at Nellis AFB from 1999-2002, 3 years at Hanscomb AFB and 5 years at Edwards AFB.

In 2006, he was sent to Edwards AFB for their test pilot school. He said this is the base where pilots are trained for these USAP using reverse-engineered ET technology. He trained for 1 year and graduated from their program. He was the head (test director) of an Electronic Warfare Group that tested reverse-engineered technology. He operated in a control room running tests. He was the intermediary between the engineers, who directly reported to him and sometimes test pilots when they had a manned craft they were testing.

He believes he can corroborate information from other witnesses. He has all his military documents and awards that he can provide.

He will testify at AARO as long as Kirkpatrick is out, which he mentioned is an insider and is meant to squash information. He is also tracking the current legislation with amnesty. He is willing to speak with you and [REDACTED] before he would make a statement to AARO or any public testimony.
