

[REDACTED]

Very rough notes from phone conversation between SMG and [REDACTED] November 25, 2023

[REDACTED] is willing to go public.

- Wants to know if we have considered legal action re collusion between companies such as Boeing and Lockheed. He was read into programs overlapping these 2 companies.
- He retired as Lt Col
- Career started at Nellis
- At Edwards was Director of [REDACTED]
- When Lt was involved with:
 - o Department of Energy – has contracts with DOE
 - o Early retired at 15 years 8 months – Has lots of friends from test school days, friends at Wright Patterson, Dept [REDACTED]
 - o Several buddies @ [REDACTED]
- Saw man made craft on the range – was there quite a bit (which range?)
- Formally read into multiple “Advanced Aircraft” programs at Edwards
- [REDACTED] when Director [REDACTED] part of a “go public” plan via the Air Force. It was called off [REDACTED]. He was moved to the Pentagon. Felt it was called off by a 2 star general – [REDACTED]
- He will be happy to provide an OPR – timeline of his career.
- He has seen man made flying systems, nuclear energy systems
- Briefed @ S4 (He was 23 y.o.) / a major said that they had caught/captured lots of aircraft
- Was working? At building [REDACTED] at Nellis, [REDACTED]
- When he was at the Pentagon he was [REDACTED]
 - o \$34 billion then \$40 billion to Non Air Force AuthorizationNON- BLUE- TOA ???

██████████ – was at Nellis / S4 as ██████████

██████ – Hanscom AFB near Boston- There was MIT involvement – exploitation of “foreign military assets” but all he saw were terrestrial craft

Edwards – Range Orientation

- left Edwards to Pentagon

■ – retired

Wright Patterson – tight connection with Edwards/ hanger [REDACTED] at Wright Patterson probably had the biologicals.

Was briefed via a 30 minute video – only saw “inspection” aircraft that were essentially invisible

His feeling is funding to expose these operations is coming from same sources that want to keep it secret.

Has been tracking SMG for a long time.

Will forward performance record – that will show OPRs

Currently lives

Worked with Mercury/ Lockheed Martin – now has his own business

If at Nellis he could drive to the venue he was at.
