I want to start by saying thank you for your time and reaching back out to me. I want to apologize now for the long email, but know that I have tried to keep it short.

My name is [REDACTED]

I was in the Navy and worked as a private contractor on Dugway Proving Grounds, Utah.

On Dugway, I was a contractor (Painter/Sign Tech) with a level 5 clearance from: 2009-2013 for

[REDACTED] Company.

Within my first 4 months in Dugway, I found myself at an area called "Avery", I was looking for electrical meters to read for the electrical usage for the government to bill the contractors.

(It was called the Ghost Building because it had no building numbers).

When I walked into the "Ghost Building", I was met with an M16 pointed at my chest from an OPS armed guard. I heard the bullet chamber.

I immediately raised my hands and did what he asked. I noticed what looked like to me UFO that they were disassembling inside the building.

Looked like they had a "Mapping System" from the UFO and what looked like to me as a triangle object almost floating in the center of the UFO. Other objects strategically placed that I couldn't really tell what they were as well in the room. I couldn't tell if it was floating or if they had some type of system keeping it off the ground. It was just a couple things that stood out to me that I could recognize. Everything happened very quickly.

If I was to guess on the size it was probably around 10' tall and 20' or so in circumference, Metallic in color and it was completely seamless.

I was immediately taken to an area called "DITTO", to the Garrison building and placed into a room where two FBI or CIA agents were. They were wearing black suits, bald and didn't disclose who they were. They interrogated me on why I was in the building and what I saw for about 6 hours.

"They contacted people I had no idea they knew, even friends I had during grade school".

I know for a fact on what I saw in that building was a UFO, but to them I had no idea and I was doing a job I was asked to do, was to read the electrical meters for that day.

I did some asking around after this incident and found a guy, "G.P." that knew about the craft. I asked about the map system they had out in the building. He seemed nervous at that moment and said, "he can't talk about it." It took a few months but he finally did. He said, "take any map and look at it... what is the fastest way to point A-B?"

He said, "fold the map to line up the two points then fall through." They displaced gravity is how he described it, "the more the displaced the faster they move."

He said that it was an ET craft. He said that he already said too much and didn't want to talk about it any longer.

Avery is also where the Black Ops NASA is located. I've been inside that building as well during a painting project we were asked to do and ran across some pictures hanging on the wall of a medical exam room. It was the same room in the pictures that I was looking at across the hall. It showed a recent picture of 6 people doing an autopsy on an alien. One of the guys that worked out their chuckled and blew it off then told me to, "look at a picture with the entire staff, look at the man in the middle on the bottom row he's a hybrid ET". He stated that he was very old and that he was helping them with projects in Dugway.

I've seen their HARRP weather system in action from the metrology building in Ditto, building 3032. I have personally watched them generate 3 rain storms on their Doppler and move them to the areas they wanted to. Their is a Peace Treaty Building, of 1977 Weather Weaponization in Ditto. They can cause any natural disaster known to man with these systems.

I know exactly where the underground area is at in the west desert and was told by G.P. that "they have a rail system that travels over 1300 miles under ground with different work areas for people".

It's just a little odd to find a door in the middle of the desert with hundreds of cars around it. Can't fit that many people

in one door...

From what I was told from an Air Force "employee", the majority of the operations in Dugway are ran by Black Ops or cash only programs.

I was also in the Navy stationed on the

USS Auxiliary Division, from: 1999-2000. I had a "friend" that was a computer "genius", (I had no idea he was). He got into their system and woke me up one morning crying. He said, "he has been caught for getting into their system and that he has information on the Twin Towers and a project called the Aurora on a flash drive".

When we read this information I felt betrayed by my country and didn't want any part of what was going to happen with the Towers. I did what I needed to do to get out of the military and save my life, though knowing that info, I felt my life was and still is in danger.

That Aurora program, (from what he found) was a craft that they use for aerial reconnaissance. The info was stating that it can travel "in orbit"

7 minutes around the world. The photo that I saw was a cigar shaped craft or what people on TV now claim are "Tic Tac" UFO's.

Mind you that my "friend" left the ship the same day I did. He said he "deleted himself" from their system like he never enlisted.
