Subject: R-Personnel

Ma'm i apologize for my hesitation
Raytheon
Personnel i felt i was betraying friends.

In the sketch of the bunker for reference, [REDACTED] is on the far left Dan is to his right i am On The Far right near the Door of the bunker.

[REDACTED] was the One Whom asked when the call came in "You want to see it?" He And [REDACTED] Smirked and Looked Past me slightly as they Shrugged there Shoulder's.

[REDACTED] Was The Raytheon supervisor He Primarily stayed inside the Eagles Nest aka Air force T.O.C. side of the Two Joined T.O.C. [REDACTED] And Dan Worked Along side Myself in The Dragons Den aka Army Lima Live Fire T.O.C. however they did Report to Rod. When the call came in for the first time i could recall the Doors connecting the two T.O.C.'s were Closed and Immediately locked When i turned to Chew Out Whom Ever Was Responsible for Not Conveying That an Exercise was In Play Not According to The Planned live Fire Training Exercise.

The Reason the event Was Not Reported Up The Chain Is Due To The Fact That This Was Not Unidentified it was Ours And Was in Fact Apart Of My Recruitment into The Programs.

Tarantula 28 was the Observer Controller on the ground whom witnessed the lights from the Ground. Also he reported this in the Mufon Report.

I Strongly believe these men will Be More Likely To Speak Out If I Lead the Way.

I Acted As The Hub Between The Operations Group intelligence Planners Ground Team Air Force And Star Wars Program i Did not have access to The interior Operations of the Star Wars T.O.C. Facilities i was given acces to enter the building in order to distribute DST basically automated live fire target deployment Scenario. This Information Was Converted into RGB maps for Step by Step training battles. Both of my Predecessors where assigned to this Facility and i did see Both Sgt. Marie Taylor And Spc. Cardamon working in the Star Wars T.O.C.. Clarification this T.O.C. was not On The Range it Was Located on the outskirts of Cantonment aka Main Post Fort Irwin.

As To Any of these Personnel Coming out It Is My Belief They Will Need To See One Of There Own Lead the Way I Was The Fastest Promoted in 25years on Post And The Youngest #1 control seat holder at the NTC Facility in history they Will All Remember Or Remember This It Was Put In The Post Paper And the Promotions Were Not At All Normal For A none Deployable Post.

Eye level from me on observation deck approx 3stories high from desert floor, Distance approx 200 ft, Size 172' across craft at center of bunker image, Strongly resembles hovering B_2 Spirit. Upon first glance during eyes adjusting to the dark 7 lights V shape Orientation where seen exactly like the (Phoenix Lights). after that i closed my eyes for approx 30s and allowed them to Adjust to The Light Conditions as To We Where Running Red Lights Threw Out the Bunker Due To Current Live Fire Exercise interrupted by the "lights above the range" call.

Once my Eyes adjusted I Could Make Out the General Shape Of The Craft. from That Point I light my cigarette put my left foot up on the concrete as seen in the sketch I then Quietly Masking My Movements Pulled my NVG's from my right BDU cargo pocket and raised them To View The Craft. Once Adjusted To The NVG's a Vary Crisp B-2 spirit with slight differences appeared to be generating the 7lights along its wings and underbelly. I Then Noticed As I Shifted Stance, Another Smaller Craft Oriented on the right side yet just as high up To The First Craft approximately 75to100 yards to the right.

This Craft Was Jet Black V Shaped Pointed towards the First Craft. This craft had equally joined spaced rectangles sections forming the the hull. The craft had a gimbal or rack that deployed from the bottom of the Craft approximately 5 to 6 holographic emitting lights where pointed directly at the First Craft. I Do believe the second craft was creating a hologram that look tangibly solid And Also the Holographic Craft If It Was Infact A holographic reneging Had The Abilities to emit light from the original 7 lights viewed without NVG's.

At that point Gregor Noticed the NVG'S Dan Looked As  Face turned towards me he Went From Chatting cheerfully with Dan to an angry look of disapproval towards me. At that point Gregor put out his cigaret and they both went inside calmly yet angry as though i crossed a line. I took another quick look with the NVG'S and hit my Cigaret deeply The Mood Had Shifted For Them For Me I Was either in trouble or not That Weight Comes With The Job so I Hadn't Reacted Just Felt Bad That He Or they May be in the hot seat.

The second crafts size was vary hard to distinguish due to the angle of orientation. however i approximated that one wing it seemed to be the length of an F_16 itself. It had no lights other than the gimbal lights jet black the b-2 seemed matted black gray
