[REDACTED]
[REDACTED]
[REDACTED]

Dear [REDACTED] and [REDACTED],

Thank you for your letter and referral to [REDACTED]. He and I spoke together on the phone the other day.

I must say I was very surprised to hear you referred me to a CIA agent (by his own admission). You know what they say, "Once CIA, always CIA." I believe [REDACTED] is a dangerous man. He is responsible for continuing to discredit those who search for further evidence. He has a closed mind, unwilling to entertain factual evidence. [REDACTED] was and I'll bet still is on the government payroll with the CIA, NSA and DIA. He is the major source for the 1994 Air Force Report on Roswell, in spite of the catastrophic mistakes he made, namely leading the Air Force to print that the Roswell crash was really Project Mogul Balloon number 9 (because it was launched in July 1947) and then being forced to retract the story when they realized that the mission had been scrubbed and there was no launch of balloon number 9. Pflock, and the Air Force then said it was balloon number 4, which couldn't have been because first it was made of neoprene--a standard weather balloon--not polyethylene, and the Air Force already admitted that the wreckage was not a weather balloon, and second, the Mogul 4 balloon had no metallic parts, except for a sonobouy. This left the 1994 report admitting the previous story was a lie--a coverup--but without a new story to take its place. Thank you Karl Pflock.

When talking with [REDACTED], I felt as if I were addressing the O.J. Simpson jury. (Let's just ignore the evidence and arrive at the verdict we want to hear) Though [REDACTED] claims to have examined the evidence in detail, I noticed that he refuses to apply evidentiary procedure to the matters at issue. Namely, you can't be a little bit pregnant.

First and foremost, he discounts eye witness testimony, fails to address [REDACTED] ignores the testimony of Wright Field Base Commander [REDACTED] and reinterprets the video taped deposition of General DuBose--then Colonel DuBose--the man who admits to fabricating the weather balloon story. While DuBose does not admit the Roswell crash was a spacecraft,

Wit'ness

(he wouldn't say what it was) he does admit that General McMullen gave the existence and recovery of the Roswell wreckage a top secret priority above the H-bomb--a little extreme for a polyethylene balloon (XXXXXX) and the most recent Air Force assertion) wouldn't you say? *

How come when other Project Mogul balloons were downed a few months later, their recovery didn't receive the same attention? They were just merely kept classified; NOT TOP TOP SECRET, or ULTRA. I wonder why? Our fear of Russian spies hadn't changed.

I suspect that XXXXXX is a paid dis-informer--one who feels he is answering to a higher governmental authority and as such is justified to do whatever he can to prevent public disclosure, a la the CIA Robinson Panel of 1952, or the Brookings Institute Report of the 1960's. He has decided to play devil's advocate to sell more books to the Carl Sagan apostles of the world.

Personally I believe that there is one man alive who, hopefully, will someday remember the whole truth. He was there and had knows what happened first hand. He desires not to talk about it. I can respect that. Or perhaps he is being intimidated not to talk by the likes of XXXXXX. But that permits what is perhaps the greatest event in the history of the world, to remain a military secret. No disrespect intended.

I have no doubt that if Roman Military Commanders could have classified the existence of Jesus Christ as a Top Secret, and sequestered he and his followers from the very beginning, they would have done so. If none of us had ever heard about Christ would that mean he never existed? What would the world be like today? Maybe we'd all be Muslims.

This active governmental link implies that you are both under watchful eyes.

I hope all is well. My Dad had to have emergency quadruple bypass surgery four weeks ago, but he is on his way to full recovery. The incident was traumatic for my mom, but she was right there for dad. I mentioned I was going to write. They said to send you their best. Please take care of yourselves, and please try not to be too annoyed by the multitudes of the curious. This letter is not intended to be rude, it's just that I have a tough time dealing with the XXXXX of the world, who instead of looking for evidence, take shots at the ones who find it.

Best regards,

Bob R XXXXXX
