Witness

I had a long detailed discussion with [REDACTED]. He is currently declining all interviews due to severe and continuous death threats to he and family members, coupled with multiple and ongoing attempts on his life. Not one to mince words or to flinch, he openly named a [REDACTED] at Wright Patterson as the ring leader of an out-of-control black op that will stop at nothing to threaten, defame, financially ruin and literally take out those attempting to bring forth hard historical evidence of ET technology transfer. There are other names he disclosed of operatives working under Schmitt to follow up on in this connection. To the extent that [REDACTED] can help our effort to expose illegal black ops, he can be an essential behind-the-scenes ally and consultant. He is definitely not somebody to trifle with or to minimize. He is a very major player who is sitting on a number of supercharged powder kegs.

[REDACTED] is perhaps one of the most brilliant computer scientists and visionary physicists alive today: [REDACTED] of [REDACTED]; President of the [REDACTED] Association; the inventor of the [REDACTED] systems that were elaborated and mass-marketed by [REDACTED]. His software innovations are powering 90% of all computers in use today. His physics background has enabled him to trace non sequitur leaps in solid state electronics that indicate infusions of knowledge from "someplace else". His analysis of these disjunctures in technological history are resolvable down to the submolecular level. He clearly demonstrated to me the breath and scope of his technical and historical knowledge, plus his ability to trace crucial innovations to laboratories at such corporations as Bell Labs and IBM to specific time periods following July, 1947.

[REDACTED] is willing to maintain a cordial and mutually beneficial relationship with Disclosure Project, but since we cannot provide physical protection or adequate financial compensation that could truly protect his family, an interview is out of the question at this time. He is already going broke from fighting two lawsuits at once attempting to bring down Schmitt's illegal operation at Wright Pat.

[REDACTED] sends his friendly regards to Dr. Greer. He's willing to talk with me face to face but off the record when I'm in New Jersey.

More to follow.

[REDACTED]
