2. ASTRONAUT NEIL A. ARMSTRONG COMMANDER OF THE APOLLO-11 MOON MISSION, TWO INTIMATE DISCUSSIONS CONFIRM THE PRIMARY EVIDENCE:

DISCUSSION ONE:

ORIGIN: Information of a first hand informant, a close associate to astronaut Armstrong. Both names withheld for security reasons. Originals in ICUFON ARCHIVES.

INFORMER'S LETTER - EXCERPTS

Dear Colman, May 24, 1988

Received your clippings that you sent. [redacted] did a good job of writing them.

Armstrong and this is what Armstrong told him.

About 1/4 of the way to the moon ~~they~~ 3 ufos came in behind them. The ufos were about 3 feet away. They photographed the ufos. They could see shadows of the e.t.'s in them. They notified Houston. After they orbited the moon, they lost the ufo's. As the module came down to land in the crater, the 3 ufos landed at the rim of the crater. The module landed. E.t.s. came out of ufos. They had on space suits.

Armstrong was told by Houston not to go out on the moon for 3 reasons.

1. That he was commander.
2. Fear of the aliens and not knowing what they would do.

3. He wasn't a military man. Armstrong disobeyed orders and stepped out of the moon. For this he was forced out of the space program.

All this time all kinds of pictures and movie film were taken of the ufos. The estimated diameter of the ufos were 50-100 ft.

DISCUSSION TWO:

ORIGIN: According to author Timothy GOOD, his close friend, a former British military intelligence, overheard Armstrong's conversation with a "professor" during a NASA Symposium. Later, when he again confronted Armstrong, the astronaut confirmed that his information was true, but declined to go into further details,-- admitting that the CIA was behind the cover up.

BY COURTESY OF TIMOTHY GOOD, his book: **ABOVE TOP SECRET—THE WORLDWIDE UFO COVER UP**, quotes the conversation as follows:

A certain professor (whose name is known to me) was engaged in an earnest discussion with Neil Armstrong during a NASA symposium, and according to my friend's recollection, part of the conversation went as follows:

PROFESSOR: What really happened out there with Apollo 11?
ARMSTRONG: It was incredible . . . of course, we had always known there was a possibility . . . the fact is, we were warned off. There was never any question then of a space station or a moon city.
PROFESSOR: How do you mean "warned off"?
ARMSTRONG: I can't go into details, except to say that their ships were far superior to ours both in size and technology—Boy, were they big! . . . and menacing. . . . No, there is no question of a space station.
PROFESSOR: But NASA had other missions after Apollo 11?
ARMSTRONG: Naturally—NASA was committed at that time, and couldn't risk a panic on earth. . . . But it really was a quick scoop and back again . . .

3. RESPONSE TO OUTSIDERS

A. Armstrong confirmation on Timothy Good's repeated inquiry...

What does Neil Armstrong have to say about the matter officially? In reply to my inquiry he simply stated: "Your 'reliable sources' are unreliable. There were no objects reported, found, or seen on Apollo 11 or any other Apollo flight other than of natural origin. All observations on all Apollo flights were fully reported to the public."³³

B. LETTERS ADDRESSED TO

Professor Neil A. Armstrong at University of Cincinnati, and to his home were returned unopened to ICUFON, and one of his follower (name withheld for security reason),--marked officially as "INSUFFICIENT ADDRESS" and "NOT DELIVERABLE AT ADDRESSEE" -- in his home!?!

1. PRIMARY EVIDENCE - SOURCE

Lecture, held on 24 November 1977, before the NOVOSTY PRESS AGENCY, Moscow, by academician Vlagyimir Georgievich AJAJA, Asst. Head of the Oceanographic Department of the National Academy of Sciences of USSR, - a candidate of the technological sciences.

ARE WE ALONE IN THE UNIVERSE? INTELLIGENCE IN OUTER SPACE - FACTS and HYPOTHESES

Translated from Russian original to Hungarian, by the Hungarian National Academy of Sciences, then received from an Academician by Major Ret. Colman S. VonKEVICZKY, MMSE, (Director of ICUFON) in exchange of his taped lecture, held on 9 October, 1986, in Budapest, Hungary. The lecture was translated into English with editorial assistance by Mary Ann HAWK and Edith MIKULA (Cleveland Ufology Project).

EXCERPTS - REGARDING THE APOLLO 11 MOON MISSION:

page 1

"I don't represent the official viewpoint. Over one year ago I was assigned within the National Academy of Sciences of the soviet Union to study the oceanographic activity of UFOs. Therefore I must be familiar with the whole phenomena including its details. Today I will speak about the facts, observations, distortions, hypotheses, sightings, observation by the American astronauts on the Moon, explanation of the phenomena and the philosophical problems."

page 5

"...The American astronauts who landed on the Moon also observed a giant shaped cylinder - the length being 1,500 meters. Astronaut Aldrin shot a movie of the object. The UFO, with extraordinary behavior, escorted the Apollo landing maneuver on the Moon."

page 10-11

"...The report of the American astronauts (Armstrong, Collins, Aldrin) who landed on the Moon (as I have mentioned already) is extremely interesting. The Apollo-11 crew noticed the UFOs shortly after their take off, but considered this to be a part of the

SB

Saturn-5's stage rocket. But the object escorted them, then advanced on their craft. The size of it was about 1.5 km. When Armstrong/Aldrin's landing maneuver was completed on the Moon, they observed a few saucer-like UFOs on the opposite side of the crater, Armstrong cried, "Damn, they are already here!" According to the orders from the Control Center in Houston, the UFO's code name was "SANTA CLAUS", but Armstrong and the crew were so shocked at the sight, that without coding it, reported. "straight ahead on the opposite side of the crater, spacecrafts of cosmic origin are pacing and watching us". Houston ordered to them to stay in the Lunar Module. Five hours later, when convinced that the UFOs had no hostile intentions, they were permitted to step on the Moon. Aldrin filmed the UFOs and the movie became TOP SECRET. This communication was released much later, and I hope the film will be shown in 1978. The astronauts left a box on the Moon, which contained the Declaration of the United Nations in 72 languages, related to outer space and the celestial bodies. But, this action to contact extraterrestrial civilizations had no result at all. This action was kept top secret for a long time, but the manufacturer of the box, and where the text was also recorded, blundered out the secret. The encounter on the Moon with the UFOs bewildered the astronauts. Aldrin has had a total nervous breakdown and as of today, his health hasn't been restored. Collins became a monk. The Moon seems to be a permanent base of the UFOs and all the Apollo crews to the Moon were under UFO observation. Also the American astronauts' scientific explosion on the Moon failed. Namely, they tried to induce a small moonquake, but couldn't trigger it. Simultaneously, in the space capsule, the oxygen tank exploded, which made it impossible to land on the Moon (Apollo-10). It also failed to fire the last stage of the rocket, which is recently orbiting on the Moon." (Bolds for emphasis by ICUFON.)

N O T E :

According to the USSR's 1989 MEDIA REPORTS, academician physical scientist Vlagyimir Georgievich AJAJA was recently elected chairman of the new ALL-UNION COMMISSION FOR THE STUDY OF UNIDENTIFIED FLYING OBJECTS of the Union of Scientific and Engineering Societies. He is the accredited liaison to the ICUFON, appointed by his President, AF General and Cosmonaut Pavel POPOVICH.
