As you may know, I am a card carrying member of the Amalgamated Flying Saucers Association. Therefore, like many other people in our country I am interested in the phenomenon of flying saucers.

It is a fascinating subject that has initiated both scientific fiction fantasies and serious scientific research.

I watch with great interest all reports of unidentified flying objects, and I hope that some day we will know more about this intriguing subject.

[REDACTED] the prominent astronomer, has stated that there is a probability that there is other life in the universe.

I favor more research regarding this matter, and I hope that once and for all we can determine the true facts about flying saucers. Your magazine can stimulate much of the investigation and inquiry into this phenomenon through the publication of news and discussion of material. This can be of great help in paving the way to a knowledge of one of the fascinating subjects of our contemporary world.

Sincerely,

>Got the letter in mail today. Did you get a chance to rees my report from

aug 27? I am working on the sightings log and a diary from aug 95 to present

day. I am sending a letter I sent to strange universe on the solar phenoma.

Its got a lot of information in it. Check out web pages Whats going on with

the sun?

and

Kind of interesting reading.
