A woman friend of mine is getting married, and I'll be attending the wedding. I just called her to ask about her future husband, and she said he is an Army Intelligence retiree. She told me that he told her that 1) extraterrestrials are real and are here, and 2) the U.S. Government is very involved with them, but will never admit to it.

Anyway, just wanted to share this little confirmation with y'all (not that any of you need any more of it!)
