

Subj: **WITNESS REPORT - West Coast**
Date: 08/16/2000 6:09:49 PM Eastern Daylight Time
From: [REDACTED]
To: DrSGreer, [REDACTED]
To: [REDACTED]

1. Obtain full name, address, phone numbers, email and other data and record same.

[REDACTED]

Please note: This witness was originally given to [REDACTED] who passed him on to [REDACTED]

This is a West Coast witness and is available for videotaping during the week of Sept. 5 - 9.

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate).

The witness holds degrees in solid state and plasma physics from the University of Chicago and MIT. He has worked as a physicist contracted to the U.S. Army.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project.

Following graduate school in 1968, the witness went to work for a branch of the Army as a physicist investigating paranormal phenomena. He was initially asked to evaluate quantum mechanical characteristics of psychoactive drugs such as LSD and BZ.

On at least two occasions between 1968 and 69, he was asked to analyze exotic metal specimens alleged to be fragments from UFOs. He was asked to examine the material using an electron microscope. He concluded that the fragments were manufactured materials with highly sophisticated sub molecular bonds, explainable only by employing emerging Super String Theory and interdimensional physics. In 69 he was shown a fragment of thin foil that exhibited all of the characteristics attributed to the resilient, indestructible material supposedly recovered at Roswell: The ability to spring back to an unblemished state when crushed or crumpled; tensile strength exceeding diamond; extreme resistance to impact, i.e., could not be penetrated or torn by gunfire.

His only explanation for the observed characteristics was scalar or dimensional physics which was only emerging as a usable discipline at that time.

He was shown a number of other artifacts and fragments in the late 60s, but due to compartmentalization, was never told of their origin.

The witness also stated that he has first hand knowledge of at least two ET races visiting Earth: Reticulans and Krill. These are the only visiting civilizations he personally knows to be real.

4. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases) ?

The witness is very willing to go on camera. He requires a clear question outline prior to the interview to focus his discourse because his knowledge is vast and branches off into many interrelated but tangential subject areas. This can be emailed to him.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials.

Difficult to locate due to compartmentalization. He has the name of the Col. under whom he worked while contracted for the Army: [REDACTED]

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

Possible.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc) .

Highly articulate, brilliant intellect. Highly credible.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

Done.
