

This is an admission to the fact of US Government involvement with the study of extraterrestrial craft since 1947. In 1953 the Central Intelligence Agency's Robertson Panel convened to discuss the implications of unidentified flying objects (UFO) on National Security in the United States. The panel discussed this aspect but the larger implication is that the Robertson Panel was tasked with covering up and hiding evidence of a recovered extraterrestrial craft on Earth.

The craft recovered from Roswell was concealed with a well-placed cover story which lasted until the late 1970s. At which time the Agency felt that independent researchers were about to uncover the truth about a crashed alien vehicle in the desert outside Roswell, NM. An effort was made to convolute the story and discredit independent researchers through acts of misdirection, seeding of false information, psycho-social manipulation and harnessing the media.

The Roswell crash vehicle (RCV) along with biological remains were retrieved and first flown to Fort Worth AAF (Carswell AFB) in Fort Worth, TX. The craft was flown to Wright Field (Wright-Patterson AFB) in Dayton, OH where it was studied by engineers and technicians from the U.S. Air Force Air Material Command T-2 Intelligence and the CIA Office of Scientific Intelligence aka. "The Wizards of Langley". The "wizards" refers to CIA employees with direct knowledge of the CIA UFO program. The biological remains of unknown origin and clearly "not of this Earth" (NOTE) were flown from Carswell to the Aviation Medical School at Brooks Field, TX.

The overall project name for the study of extraterrestrial encounters was CONJURE. The study of alien craft and various fragments was codenamed SORCERER and the study of the biological remains was codenamed OCCULT. This has all changed and the most recent project names are MERIDIAN for ET craft, ICON for biological samples and the umbrella project was until recently known as CORNERSTONE. There are many subprojects under CORNERSTONE, my project was facilities management called OVERCOAT. CORNERSTONE is a joint CIA / Defense Department program.

A permanent and more secure location was sought for both the craft and the biological remains and the task was undertaken by Dr. Thornton Page head of the CIA's UFO program 1952-1976. The location was found in the coastal region of Eastern Virginia area outside of the tourist destination known as colonial Williamsburg. Camp Peary is a secret CIA base where operatives learn intelligence tradecraft. Officially known as the Armed Forces Experimental Training Activity (AFETA) run by the Department of Defense this is a cover for a CIA training school which is a cover for the extraterrestrial visitation study program conducted by the CIA and is not accountable to any federal agency. The head of this group known popularly as "MJ-12" (incorrect) is the Under Secretary of Defense for Acquisition, Technology and Logistics a fictitious position at the Pentagon which deals solely with extraterrestrial alien reconnaissance, surveillance and infiltration. Infiltration is defense terminology for "visitation".

The facility at "The Farm" (Camp Peary) was a six story structure with another four stories underground. The facility included space for these various functions: vehicle recovery and storage unit with laboratory; cryogenic storage facility for biological samples with laboratory; fragments identification and storage from various global sites; quarters for personnel on continual alert to respond to reported crash sites globally within 6 hours (Detachment 2 of 8 global detachments), helicopter hangar and tarmac; motor pool; agency management bureau; onsite clinic; decontamination and isolation facility; crisis management center; deep underground shelter; CIA Spectrum Management Office Det. 2; Signals Intelligence (SIGINT) intercept detachment (with feed from offsite location at Northwest, Va); passive exploitation activity; Marine Corp Special Operations unit (facilities security); offices for personnel of the psychological warfare division recruited from Special Forces psychological warfare school at Fort Bragg; media relations, historical research and archives specialists. Many of the military personnel had been fed a false cover story that the extraterrestrial investigation activity is in fact a counter-terrorism unit. Of the 427 people involved in the program at Camp Peary only 54 knew the truth about the facility as it was highly compartmentalized. Various American government agencies are used

as cover for operations at Camp Peary.

The facility at Camp Peary was known as the Defense Exotic Technology Activity (DETA) and it was shut down July 27, 2009 when Dr. Steven Greer leaked the location and function of the facility in an interview (July 26, 2009) with a UFO studies organization called Project Camelot. It was unknown how Dr. Greer came about this information but this leak was enough to put the entire agency into crisis mode. The alien craft, fragments and biological specimens were immediately transported to an alternate site and within one week the demolition of the building, grounds and underground components had begun on the facility at Camp Peary. All relevant research material that was transportable was shipped to an unknown facility somewhere within a 200 mile radius of Washington D.C. Those of us involved in the dismantling process speculated that this new site is Mount Weather but there is no confirmation. Dr. Greer was never read in on the facility and its function and to CIA's consternation it is not known how he acquired this information, at times various personalities in the UFO research community are used in false flag media operations but only two of these people are "self-aware" or have any idea that they are being used in such a capacity and Dr. Greer is not one of them.

Media control in this situation has been successful.
