AL
FYI [REDACTED], my neurosurgeon friend and ex-ship's doctor on a Navy Spy ship, also observed what he thought was a goon outside the hall in Fullerton. The guy had on dark glasses and was reading a newspaper sitting in a car. [REDACTED] was of course trained to spot such things during his Intelligence days.

Of course it could have been [REDACTED]

★
[REDACTED] has several Naval UFO stories to tell, including one about a UFO that landed out in the desert in the Persian Gulf causing some radiation like burns to the local Arabs when he was out there.

He enjoyed the talk, but is not too excited about the potential hassle if he speaks out. I will continue to stay in touch with him as we have been friends for 20 years. He was living in Bahrain when we were there drilling for oil.

★
He is also a buddy of [REDACTED], the Navy Seal that used to track the craft from their underwater bases. They had a special catamaran or hovercraft to do this, but were always outrun by the UFOs.

He told his girlfriend, who drove him to the talk, that they would be running a "make" on her licence plate.
