

Foundation for UFO Research

Executive Summary

UNIVERSITY OF THE STARS™

**An Educational, Research, and
Cultural Institute Dedicated to the
Study and Understanding of
Extraterrestrial Life
Throughout the Universe**

Planned Project: *UNIVERSITY OF THE STARS™* - An Educational, Research and Cultural Institute Dedicated to the Study and Understanding of Extraterrestrial Life Throughout the Universe

Market Opportunity/Structural Analysis:

There is an incredible yearning by people around the world who are thirsty for information on the possibility of life in outer space. At no other time in the modern 20th century has there been such a great interest in this topic. And currently no institution of higher learning addresses this information from this perspective.

Mission/Competitive Strategy: To create an exciting educational complex, positioned as the *premier nexus point* of higher education, dedicated to the study of extraterrestrial life and civilizations throughout the universe. As a dynamic and focused information repository, it then disseminates this new extraterrestrial knowledge to Earth's people, and educational systems.

Focus/Benefits: For the thousands, even millions, of people from around the world who have ever dreamed of learning about extraterrestrial life -- learning through the *UNIVERSITY OF THE STARS™* will be a total immersion in their dream. No place else in the world will people find a focus dedicated to the study of extraterrestrial life -- a study that is challenging, stimulating, educational and enjoyable.

- The *UNIVERSITY OF THE STARS™* acquires, researches, studies and analyses extraterrestrial information -- resulting in an extensive extraterrestrial knowledge repository.
- Develops, and distributes, curriculums and knowledge packages, for educational institutions world wide.
- Educates Earth's scholars, teachers and diplomats.
- Hosts guest scholars, teachers, and diplomats from earth, and other star systems, to educate earth people about the various societies, cultures, sciences and technologies throughout the universe.
- Serves the individual, business, industry and government.

- This approach will help foster a greater understanding of various extraterrestrial civilizations, cultures, and life forms, as earth societies someday soon prepare to join a greater universal community of planets and civilizations.

General Description/Major Components: As a major part of this educational complex, an Extraterrestrial Culture Center will incorporate a museum, and library, for collections, artifacts, and exhibitions.

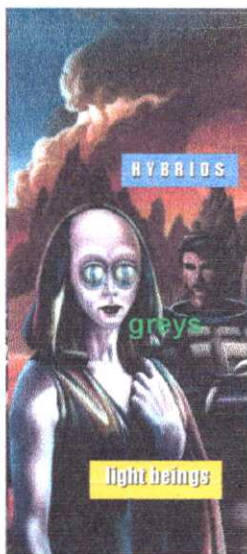

Advanced digital multi-media entertainment technologies will be used in educational applications for accelerated learning and comprehension. Combined with the use of immersive environments, people will have very vivid and memorable learning experiences.

- Extraterrestrial Culture Center: museum for special collections, artifacts, and exhibitions research, paper and electronic library, auditorium, amphitheater
- Educational Center: teaching, classroom facilities and curriculum development
- Conference Center: conference, seminar, meeting and teaching facilities
- Business and Trade Mission Center: extraterrestrial technology, industry, trade and commerce pavilion
- Media and Communications Center: television, radio, motion picture and video production studios, satellite uplink capabilities
- Living Center: Hotel, casitas, health spa, restaurant

Location: Tucson, Arizona

Phase I, Planned Opening Date: Fall Semester 1999

Physical Size: 300+- acres, depending on land use research and finalized masterplan.

Semjase, of the Pleiades, is known to have said, "...If everyone on earth works together, you could be where we are in 300 years."

The *UNIVERSITY OF THE STARS™* can help prepare Earth's people for a broader universal consciousness, so that we can become fellow citizens of the universe. It can help facilitate the shift from that of a competitive society to one whose races, cultures, and people work, live and join together in harmony. It can encompass a system based upon spiritual equality and the healthy recognition of the self worth of each being. It can help bring about a new consciousness, a new people, and a new world.

As Robert O. Dean, noted extraterrestrial researcher and scholar is known for saying, "...we can start thinking of ourselves as one race, one people, from one little tiny planet...and we must go into the 21st century, and the universe, together."
