

LOCKHEED MARTIN

MISSILES AND SPACE COMPANY

Dear 

It is nice to hear from you. Time lends perspective, and ol' folks like us have lots of both!

Although my philosophy emphatically permits the existence of UFOs, no evidence that I can muster supports their actual existence. Violating an oath isn't a problem, since the last one I swore was to love and honor my wife; there's just nothing to hide.

I'm aware of (not familiar with, in detail) the extensive body of sighting testimony that various people have gathered. But don't you agree that, while this evidence may be admissable by the standards of journalism, it doesn't meet those of science?

Anyway, have fun.

Sincerely,
