

Brian O'Leary, Ph.D.

~~CONFIDENTIAL~~

Scientist • Author • Public Speaker
Former Astronaut

August 5, 1995

Dear

I am writing this letter to a few of my former astronaut colleagues I had known while I was in the program almost thirty years ago. It's amazing that so much time has passed since then. For one thing, I've more than doubled my age, and most of you are at least close to that point. Yet I feel I know less and have more to learn than I had thought in those days.

Over the past ten years I have taken a strong interest in research on some scientific subjects which are often considered taboo in mainstream circles. Of particular relevance is evidence on the UFO/alien mystery, which never seems to go away.

I am currently involved with a group of highly credentialed scientists, military and intelligence people to urge that the government come clean with what it knows about these sensitive subjects, now that the Cold War is over. Called the Starlight Coalition, we have had a series of meetings funded by Laurence Rockefeller involving the gathering of testimonies and potential testimonies of credible witnesses to anomalous sightings and experiences. Ed Mitchell and Gordo Cooper have participated in our group.

We are attempting to secure immunity against prosecution for violating secrecy oaths for those who have witnessed UFO phenomena. If this applies to you, we would like to hear from you, because the greater amount and quality of testimony, the greater the chances of success that we will know the truth.

If you're interested in participating, please send me a note or fax or give me a call.

Best regards,

Brian O'Leary
