

3 March 1995

Dear Steven and 

Thanks for sending your information along. I've read it slowly because of the press of other projects and stuff. As I told Steven, you guys are the only other ones seriously advocating the psychic contact angle, which I began discussing years ago, but got nowhere with it. But you guys are a group, and organized, and vastly more dynamic than I am. And so I wish you all the best, and will try to keep track of your mission.

I really hope circumstances do come about so that you can achieve something. I tend to be an old veteran in all this who for too long has witnessed nothing never amounting to very much. But you seem to have such unbounded energy that the chances are very good you'll somehow change the otherwise rather dull status quo. You've certainly got my best wishes, and I've already argued in your favor to a number of dubious people.

Please keep in touch occasionally, and when next in NY try to set aside some time for a visit.

Very cordially,
