Good Morning Dr. Greer and team,

I am reaching out to provide any minor information that I may potentially have that may help correlate to other witnesses stories or experiences.

I was in the Marine Corps between February 2006 - October 2013. I can provide documentation to confirm my time in the military as well. I was born in Maryland, but I have settled in West Virginia, and work in DC and northern Virginia. I am aware of the location you have recently setup in Virginia, and would be willing to make the drive sometime, should you ever need a hand with any IT setup, or any information regarding my experiences.

Although my military experience never involved any "black budget projects" or anything of the likes, I have witnessed some UFO sightings, all different in nature. I was stationed in Camp Lejeune and made 3 deployments out of the US. Witnessed nothing during this time.

However, when I reenlisted and spent the second half of my enlistment in Twentynine Palms, CA, I had witnessed a handful of things that may correlate with others eyewitness testimonies. Three sightings over the base, one sighting in Palm Springs, one in Bridgeport CA, and one sighting (possibly nothing, but I usually nonetheless) off base in Twentynine Palms. I can always go into elaborate detail from what I can recall from these sightings should you be interested or find use for my experiences.

I have witnessed two or three other UFO sightings outside of my time in the military as well. Feel free to reach back out to me any time.
