Fwd: Need Assistance with A Mass Sighting in SLC, UT

Not military but definitely a witness.

You guys are all heroes, and thank you for all your hard work. I'm contacting you regarding a possible mass sighting of a large (2-500ft height) barbell shaped craft that was accompanied by a flight group of blackhawk choppers over Mt. Olympus, SLC on January 13th 2018. I believe we can help eachother.

I live in Salt Lake City, about 40 miles from Dugway Proving Ground(and DUMB) towards the east bench of the city at the foot of Mount Olympus here. On January 13th of 2018, my mother, her neighbor and myself witnessed a sortie(10 or so) of blackhawk helicopters flying at about 1500ft above ground level passed overhead heading west/northwest from the direction of dugway proving ground. The story is LONG and a lot of weirdness happened within this 3 to 4 minute timespan, but basically this line of choppers(no acoustic signature) fly over the twin peaks of mt olympus and begin to circle the peak. One of the choppers drops this large black ball in between the peaks before a craft appeared. As I am watching this through binos, we see a huge(200-500ft) barbell ufo(vertical) appear in the middle of this circle. It had a square top and bottom, and was emanating a kind of light from the top. I wont give all the details for sake of space but as we are watching these choppers and this craft the clouds around the peak begin to speed up, squiggle, and turn orange. The craft heads south from the peak and then blinks out the moment I pressed the button on my camera, no proof...but there were three of us that saw it there. Considering this happened in the middle of the day in front of a city of hundreds of thousands of people I am sure many many other witnesses saw this, although after posting signs in the canyons, roads and getting on social media I have had no luck. I'm fielding the story to podcasts and journalists because I know there are people with farther reach than I who can help me find more people who saw this, there have to be hundreds if not thousands. This looked like they were presenting something, because theres no way this way a "secret" operation. Not where it was, not as front and center as it was. Theres something strange going on here, and I'm confused as to the what the result of this OP was supposed to be. I am up to date on all of your work including the entirety of the national press conference, I know you guys can help me out here. I'm involved in the UFO podcast circuit and have made presentations regarding this experience, but I dont have the resources or authority to sus this out. Please help me.
