February 13, 2012 13:29

alien "Alexis" from Kyshtym in the Chelyabinsk region identified one of the most mysterious creatures in the history of mankind. It is a mysterious humanoid, known worldwide under the name "Alexis". And unlike many of the mystical mysteries — this is not speculation, based solely on the testimony of witnesses, and the undeniable, documented footage and medical reports is a fact. Strange humanoid creature found in 1996 in a village near Kyshtym. First discovered humanoid local crazy. "Walking" at night in the cemetery, she saw the lonely churchyard near the baby and decided to take him home.

The old woman called him "Alexis" and began to look for a humanoid creature, as a foster son. However, the village rumors that her grandmother "aggravated mental illness" and soon she was taken to a psychiatric hospital. Curiosity, a few days in the house of a local thief got mad, but the creature was already dead. Appear to have died of starvation ...

Then the man decided to sell in alcohol and monster, but not in time. Soon the thief was caught stealing, and on the other to avoid punishment decided to give the "alien mummy" investigator ... as a bribe. Policeman named Bendlin of the "gift" has refused, but in a legal way, "mummy" is still flawed.

Surprised by the unusual appearance of the deceased "baby", Bendlin mummy sent for examination. After examining the body, the pathologist Stanislav Samoshkin, made a sensational conclusion — the creature has no relation to the human mind: "The head is built as a water lily, helmet shape and is made up of only four bony plates. A human skull consists of six plates, how he or mutant monster was. Bones are cartilaginous, and quite normal, tubular. That the human infant is simply impossible." Pathologist suggested that the creature may be an unknown animal science. His words were confirmed by the local gynecologist.

Bendlin prudently filmed on camera and mummy, and his private investigation. It turned out that another living creature daughter saw an old woman. Here is how she described the meeting with him, "I saw a tiny little monster, Onion dome head. Instead of the lips — a hole in them two tooth. Unnaturally white skin, and the hands and feet claws. No chin, genitals and navel too. He looked at me without blinking." While Alexis could itself move.

By the way, according to the testimony daughter, "alien" only ate sweets: cottage cheese, condensed milk, caramel, and drinking only sweetened water.
