

Admiral of the Fleet The Lord Hill-Norton GCB

Dr Steven M Greer MD
CSETI

3 October, 1995

Dear Dr Greer,

Thank you for your letter of 1st September and the enclosures. It must have just missed me, for we went to Portugal on holiday on 7th, so it was waiting for me when we got back last week.

I thoroughly enjoyed our talk when you came here in August and I am grateful to you for your time. I read all the material you left me and I intend to read it all again, though I have sent some of it on to the Countess of Moray, who shares my interest (I have an idea you may have met her some time ago).

I find your latest Brief on NSI Implications of the UFO/ETI subject, very clear and very convincing. It is important for all of us to realise that, as you say, times have changed. In particular the end of the Cold War has vastly reduced the military/political importance of denying any potential UFO information to the other side.

There has been considerable media interest here recently, provoked by the dispute over Mr Sheffield and his approaches to the European Parliament. I have been on the fringe of it all, but I take the view that any publicity on this matter must be good.

I do not, certainly at the moment, have any important or prominent witnesses who I could recommend to you for your coalition, though the recent uproar has brought me several most convincing sighting reports. One was from a (former) air line Captain and another from an ex-soldier. Neither has anything to gain, and the former has possible loss.

Please keep me in touch.

Yours sincerely,
Hill-Norton
