

August 5, 1992

Mr. 

Dear 

Please excuse the familiar term of addressing you but since the advent of CNN and the many interviews of you with Larry King we feel as though we know you. Indeed, through our many years of concert tours throughout the world one of the requests of our agents, along with apple juice and fruit in the dressing room and the three-bedroom suite, was that the hotel had CNN cable.

Over the years we've cheered your pioneer spirit providing the world with news and, for Americans, that wonderful touch of home.

Now the time for inter-galactical communication has come - and the reason for this letter.

The enclosed CSETI program is for your study. We recommend most highly, young Dr. Steven Greer. We find him remarkable and knowledgeable (much like yourself) and would really appreciate it if you would arrange a meeting with him. We firmly believe CNN should be the launching pad for this worthwhile and news-worthy project.

Yours sincerely,

P.S. Best wishes and congratulations to you and 

Enclosure
