Dear 

Good to hear from you after all these years. Looks like you have kept busy through the years. It is always nice to hear from colleagues that have shared an experience, even if so long ago. We have, indeed, doubled our ages since those very exciting days. The point was brought home to me last June when I went to my 40th West Point reunion. Does not seem possible. I still think and feel like 30, but my body is telling me something else.

I can't help you much on your quest for testimonials of UFO's or Aliens. I certainly did not see anything out there that even comes close to E.T.'s. But I do wish you luck in your search. Incidentally, if you would like to read a scholarly book based on the ancient Sumerian tablets, get the "12th Planet" written by Zecharia Sitchin. In my opinion he is very close to the truth. The Sumerians could have been the first settlers, and the tablets tell an amazing story.

Other than the reading I have no good input for you. But best of luck with your effort.

All Best Wishes,
