Have read the Website.

Not as wacky as it seems.

> Dear Mr. [REDACTED]:

> I am a contributor to numerous 1970s issues of your magazine, AIM, now
> included in the 1998 WHO'S WHO IN AMERICA.

> I am partially amnesiac before 1975, but I'm reasonably certain I shot
> John Kennedy, under the direction of osteopathic physician and
> hypnotist, [REDACTED] of Port Hope, Michigan. I've dealt with the
> matter in CONJURELLA at...

> These are the [REDACTED] Fan pages (about me, not by me), from
> California, Canada and Texas...

> [REDACTED]

> The last address, [REDACTED] Texas T. CASEY BRENNAN ARCHIVE, deals with the
> disappearance of [REDACTED], who should be considered a
> witness if CONJURELLA is true. By the account given me, she was
> ordered committed to a mental health institution during the Garrison
> investigation. She was dragged from her home screaming "Casey shot
> President Kennedy", whereupon she then "disappeared into the mental
> health system", and her family has not been able to contact her since.

>This matter should not be considered unconnected with the
>well-documented CIA MK-ULTRA experiments in Toronto in the late 1950s,
>predating the JFK assassination, and discussed at length in the American
>Psychiatric Association volume, PSYCHIATRY & THE CIA, by Harvey M.
>Weinstein. I would like to suggest a report on CONJURELLA in AIM, along
>with references to my various contributions to AIM throughout the 1970s.

>
>Sincerely,
