DEAR DR. GREER, 1/27/07

HAPPY NEW YEAR;

I HAVE JUST COMPLETED MY SECOND NEW 93 H.P.
FOUR CYL. AUTO ENGINE WHICH IS MODIFIED TO
RUN ON HYDROGEN ONLY AND MY THIRD ENGINE
WILL BE READY TO INSTALL IN MY CAR IN ABOUT
FOUR WEEKS. I NOW HAVE A DALE EARNHEART
RACE ENGINE MECHANIC WORKING FOR ME
FULL TIME. I'M INSTALLING MY NEW \$30,000.00
DYNOMOMETER THE FIRST WEEK IN MARCH TO
IN HOUSE TEST MY OWN H2 CONVERTED ENGINES.
I HAVE BROKEN THE WORLDS RECORD FOR THE
SLOWEST STEADY RPM FOR AN INTERNAL COMBUSTION
ENGINE WITH A MAX. EXHAUST TEMP. OF 101 DEGREES F.
AT THAT SLOW SPEED FOR FOUR HOURS AND TWENTY MIN.
TOTAL RUN TIME AND SO SMOOTH THAT I STOOD A NICKEL
ON EDGE ON TOP OF THE ENGINE WITHOUT IT FALLING OVER.

HI DR. GREER, 11/26/08

HAPPY THANKSGIVING TO YOU AND YOUR FAMILY.

JUST RECEIVED A LARGE INHERITANCE WOULD
LIKE TO HELP ORION AS SOON I RECEIVE IT,
IF YOU ARE WILLING TO WORK WITH ME OUTSIDE
THE BOX. MY VANDERBILT REPORT SHOWS THAT IT
ONLY TAKES 6.1 POUNDS OF AL USING MY METAGEN
FUEL SYSTEM TO PRODUCE ONE KILOGRAM OF H₂,
WHICH IS THE EQUIVLENT OF ONE GALLON OF
GASOLINE OR 120,000 BTU'S AND THE H₂ IS
99.9% PURE.

YOUR FRIEND,

Awesome_powerpoint1.pps
